

1 **Name of Study: Contraception Induced Menstrual Changes**

2 **Study component: Focus Group Discussion, Females**

3 **FGD ID#: CIMC 106**

4 **Date of FGD: 28 February 2025**

5 **Time FGD Began: 10:53**

6 **Time FGD Ended: 12:54**

7 **Name of Facilitator: [redacted]**

8 **Name of Note taker 1: [redacted]**

9 **Name of Note taker 2: [redacted]**

10 **Location of FGD: Wits MRU board room**

11 **Name of Transcriber: [redacted]**

12 **Name of Translator: [redacted]**

13 **Name (s) of Reviewer (s): [redacted]**

14 **Observers: [redacted]**

15

16 ***CONTEXTUAL INFORMATION***

- 17
- 18 • *This was an FGD with women between the ages 18-49 years.*
 - 19 • *The interview was conducted in a private interview room.*
 - 20 • *The participants were relaxed, laughing, responsive, and willing to share their perceptions and experiences. Overall, the FGD was fun, informative and we enjoyed it.*
 - 21 • *There were 6 females in total.*
- 22

23 ***VERBATIM TRANSCRIPT***

24 **F: Date is 28 February 2025. Time is 10:53. Focus group C106. I would like to welcome you again**
25 **today. Thank you for being part of our focus group discussion. So, in our focus group discussion**
26 **today, we will start our discussion with an activity that I would like for us to do just to ease our**
27 **minds and relax. We will remember that we have numbers today, right//**

28 **//Yes// [Participants response]**

29 **F: //because we won't be using our names when continuing with our discussion. So, before we**
30 **continue with our discussion, I would like for us to get to know each other better. So, there is an**
31 **activity that we will start now that goes like this, what animal do you most relate to, and why do**
32 **you choose this animal? So, I will start so that I can give you an example. I see myself as a tiger.**
33 **We all know that a tiger has stripes, so its stripes are the ones that make it unique. So, I also see**
34 **myself unique. But what I like the most about a tiger is that when a tiger wants food, it goes and**
35 **hunts. It doesn't go usually go with the crowd, it usually goes alone when the other animals are**
36 **sleeping, it goes and hunts and finds something. I am also like that; I don't usually go with the**
37 **crowd. I am an individual who most the time walks alone but at the same time I am an**
38 **individual who when she wants something in life, goes after it. I make sure that I get it, I try to do**
39 **my best to get what I want. Yeah, thank you. That's me [Chuckles].**

40 **P4: Number 4.**

41 **F: Yes.**

42 P4: I am like a chicken. A chicken when it has given birth it protects the eggs – when it lays eggs, it
43 protects the eggs for those certain days. Like me, I like to gather my family and stay together, even if
44 there are circumstances in life, maybe at home, I like to make them sit like how we are sitting and be a
45 family. When it [Meaning: Participant is referring to the chicken] has laid eggs and there are chicks, it
46 also protects them. When a dog or a cat comes, it fights.

47 **F: Mhm [Neutral].**

48 P4: I am a person like that, you can't touch my sister in my presence. No matter how wrong she is, if
49 you are an outsider. Thank you.

50 [Participant raised her hand]

51 **F: Thank you, number 4. Number 6.**

52 P6: I see myself or I wish to be a lion.

53 **F: Mhm [Neutral].**

54 P6: Why do I say that? A lion is an animal that fights, that doesn't want to get killed by other animals.
55 So, if I am planning to do something, I don't rest without getting it. Like, I persevere until I get it. No
56 matter how hard it is. I step back and regain strength and come back to fight.

57 [Participant raised her hand]

58 **F: Thank you, number 6. Yes, number 3.**

59 P3: I wasn't expecting this question [Chuckles]

60 **F: [Chuckles].**

61 P3: But I would say I see myself more like a Chow Chow, which is a dog.

62 **F: What is it called?**

63 P3: Chow chow.

64 **F: Oh okay...**

65 P3: It is very aggressive, but it is also very loyal.

66 **F: Mhm [Neutral].**

67 P3: And if it's owned by the right person it ends up being less aggressive and be more passionate if I
68 can say that.

69 **F: Mhm [Neutral].**

70 P3: Yeah.

71 **F: Mhm [Neutral], so if you say if it is owned by the right person, it becomes less aggressive//**

72 P3: [Chuckles] That's not what I mean, I mean if you are around the right crowd then you become more
73 of yourself because like, I will say I am very sensitive, so I feel the need to protect myself. So, I can
74 come across very aggressive at times//

75 **F: //Mhm//**

76 P3: //But if I am around the right people, I'm not going to be so aggressive.

77 **F: Okay...**

78 P3: Yeah.

79 **F: Alright. Thank you, number 3. Number 2.**

80 P2: Uhm, all I can say is that I see myself as an aunt.

81 **F: Mhm [Neutral].**

82 P2: Like, reason being an aunt works day and night. So, like I want to work hard to my way to success.
83 Then when I have reached a certain goal, then I will rest.

84 **F: Mhm [Neutral], thank you, number 2. Number 1. Yes, I have noted you, number 5 and number**
85 **7.**

86 P1: I see myself as a lion, because a lion fights if wants something, like me, I fought when I wanted my
87 matric. So, I repeated a class. So, since I am saying it is a lion, a lion can - if it wants something it works
88 hard. [Participant is speaking softly]

89 **F: Mhm [Neutral].**

90 P1: I also work hard to get what I want. [Participant is speaking softly]

91 **F: Okay, thank you so much, number 1. Please may I remind you to raise your voices so that we**
92 **can hear you on the recorders. Number 5, I have noted you, number 7.**

93 P5: I see myself as a springbok, because I can see danger quickly. If I am in danger, I quickly remove
94 myself from the danger. I run away. If I can see that the situation that I am facing at that time is beyond
95 me, I can't face it, I can leave it like that and run away. I see myself like a springbok.

96 **F: Okay, thank you, number 5. Yes, number 7.**

97 P7: I see myself like a cat. A cat, when you own a cat, it doesn't runaway. Even if you throw it away,
98 the cat comes back [Chuckles]. The cat comes back, yes, it is important that where you were raised, no
99 matter what happens, stay because they are your family. Even if you take it [Meaning: Participant is
100 referring to the cat] while it is still small and made it stay in the house, the cat is troublesome, it is very
101 playful, even if you throw it away but still it comes back. Even if you hit it, but still, it comes back.
102 Yeah. Same with family, a family, no matter what happens, even if there are challenges in the family
103 but you must stay, so that you can solve them.

104 **F: Mhm [Neutral].**

105 P7: Yes.

106 **F: So, you are a person who can withstand all circumstances.**

107 P7: Yes, circumstances...

108 **F: Alright, thank you so much, number 7. I am very happy to get to know all of you. I think it**
109 **was an interesting activity. We will continue with our discussion. We must relax, I can see that**
110 **you are serious.**

111 [Chuckles by participants]

112 **F: No, let us all relax, talk and raise our voices. Okay, so, for the rest of our discussion today, we**
113 **will talk about menstrual cycles. Sometimes women use different words when talking about**
114 **menstrual cycle or the days of the month when they are bleeding. Which words do you usually**
115 **use when you are talking about menstrual cycle?**

116 [Participants raised their hands]

117 **F: Yes, number 1. I have noted you, number 6.**

118 P1: **Ukumensa** [Meaning: It is a Zulu slang word that is directly translated as menstruating].

119 **F: Mhm [Neutral].**

120 P1: At home when I am on my periods, they say **ngiyamensa** [Meaning: It is a Zulu slang word that is
121 directly translated as I am menstruating].

122 **F: Mhm [Neutral].**

123 P1: Yes.

124 **F: Okay, the word ukumensa, is it a Zulu word or can you explain to us what does it mean?**

125 P1: I also don't understand well, my grandmother always says that **ngiyamensa** [Meaning: It is a Zulu
126 slang word that is directly translated as I am menstruating].

127 [Participants raised their hands]

128 **F: Uyamensa** [Meaning: It is a Zulu slang word that is directly translated as you are
129 menstruating], okay. **Alright, yes number 6, I have noted you, number 5 and number 7.**

130 P6: I say **ngikuma-period** [Meaning: It is a Zulu slang word that is directly translated as I am on periods].

131 **F: Mhm [Neutral].**

132 P6: If I am on my periods, that is what I call it.

133 **F: Okay, it is an English word.**

134 P6: I think it is an English word, but we call it in isiZulu because I say **ngiyakuma-periods** [Meaning:
135 It is a Zulu slang word that is directly translated as I am going on periods], you see.

136 **F: Oh okay, so, you personally say ngiyakuma-periods** [Meaning: It is a Zulu slang word that is
137 directly translated as I am going on periods].

138 P6: Yes.

139 **F: Alright, yes number 5. I have noted you, number 7.**

140 P5: We usually say **sisezinsukwini** [[Meaning: It is a Zulu word that is directly translated as we are on
141 our days. In this context the term, "days" means the days when an individual is on her menstrual
142 periods].

143 **F: Mhm [Neutral].**

144 P5: If an individual is on periods at home, they normally say so and so **usezinsukwini** [[Meaning: It is a
145 Zulu word that is directly translated as she is on her days. In this context the term, "days" means the
146 days when an individual is on her menstrual periods].

147 **F: Mhm [Neutral].**

148 P5: That is the way we speak at home, that so and so **usezinsukwini** [Meaning: It is a Zulu word that is
149 directly translated as she is on her days. In this context the term, "days" means the days when an
150 individual is on her menstrual periods], if she is on periods at that time.

151 [Participant raised her hand]

152 **F: Alright, okay. Thank you so much, number 5. Number 7, I have noted you, number 4.**

153 P7: At home they say **uyeskhathini** [Meaning: It is a Zulu word that is directly translated as to go on
154 menstrual periods].

155 **F: Mhm [Neutral].**

156 P7: Yes, that is the way we speak, if a person is on periods we call it **ukuya eskhathini** [Meaning: It is
157 a Zulu word that is directly translated as to go on menstrual periods].

158 **F: Ukuya eskhathini** [Meaning: It is a Zulu word that is directly translated as to go on menstrual
159 periods].

160 P7: Yes.

161 **F: Alright, okay. Thank you so much, number 7. Yes, number 4.**

162 P4: I say **kusuke kufike ama-visitor** [Meaning: It is a Zulu phrase that is directly translated as it is when
163 visitors have arrived. In this context it means that menstrual periods occur unexpectedly just like a
164 visitor that comes unannounced to visit]. [Chuckles]

165 **F: Okay...**

166 P4: Because sometimes, since I am getting an injection [Meaning: Participant is referring to the
167 contraception injection], periods just arrive when I don't expect them. A visitor arrives when you
168 haven't invited it. A person comes knocking, you can't chase them away. [Chuckles]

169 **F: Okay, thank you so much, number 4. Yes, number 3.**

170 P3: I also say, **ngisuke ngiseskhathini** [Meaning: It is a Zulu word that is directly translated as I am on
171 my menstrual periods].

172 **F: Eskhathini** [Meaning: It is a Zulu word that is directly translated as I am on my menstrual
173 periods], okay. **Alright, no, thank you so much. Which other words have you heard of that other
174 women use, that you have heard of?**

175 [Participant raised her hand]

176 P3: I know that they say, it's that time of the month.

177 **F: It's that time of the month.**

178 P3: Mhm [Neutral].

179 **F: Oh okay. What do they mean?**

180 P3: That they are on periods.

181 [Participant raised her hand]

182 **F: Okay, alright. Yes, number 2, thank you, number 3.**

183 P2: At home they say, **ukudabuka** [Meaning: It is a Zulu word that is directly translated as to tear apart].

184 **F: Okay.**

185 P2: Based on that, isn't when you are on periods, I think I am not sure what wall tears until blood comes
186 out.

187 **F: What happens?**

188 P2: Uhm, I think, I don't know the name of it, but there is a wall inside//

189 **F: //Mhm [Neutral]//**

190 P2: //the vagina. They say it is when it is tearing apart//

191 P3: // The lining//

192 P2: //Yes. That's why they say, **uyadabuka** [Meaning: It is a Zulu word that is directly translated as to
193 tear apart].

194 **F: Oh okay, and it means that you are on your periods?**

195 P2: Yes.

196 [Participant raised her hand]

197 **F: Alright, okay. Yes, number 6.**

198 P6: It is these ones, **ukumensa** [Meaning: It is a Zulu slang word that is directly translated as
199 menstruating], **eskhathini** [Meaning: It is a Zulu word that is directly translated as menstrual periods],
200 these ones that have been counted here, they are the only ones that I know.

201 **F: Oh...**

202 P6: Yeah, it depends on which one you are using.

203 [Participant raised her hand]

204 **F: Okay... Yes, number 1.**

205 P1: Others say, **irobot livaliwe** [Meaning: It is a Zulu phrase which is slang, directly translated as the
206 robot/traffic light is closed].

207 [Chuckles by participants]

208 **F: The robot is closed.**

209 P1: Yes.

210 **F: Okay. What does it mean? Why do they compare it with the robot [Meaning: It is a word that
211 means traffic lights]?**

212 P1: Isn't when you are on your periods, the blood is red. So, a closed robot [Meaning: It is a word that
213 means traffic lights] is red.

214 **F: Oh okay...**

215 P1: Mhm [Yes].

216 **F: Thank you so much. Are there maybe other words that you have heard of, that don't talk about
217 being menstrual periods but that talk about the whole menstrual cycle. This is before you go on
218 your menstrual periods and after being on your menstrual periods. Are there any words that are
219 used for your menstrual cycle?**

220 P6: It is **ukuthomba** [Meaning: It is a Zulu word that is directly translated as puberty] or it is something
221 else. **Ukuthomba** [Meaning: It is a Zulu word that is directly translated as puberty].

222 **F: Ukuthomba** [Meaning: It is a Zulu word that is directly translated as puberty].

223 P6: Yes.

224 **F: Yes, number 6. What happens when a person *ethomba*?**

225 P6: From my understanding, **ukuthomba** is when it is your first time – like if you are a child, your first
226 time menstruating.

227 F: Oh...

228 P6: They say *uyathomba*. I don't know if you have started and have dates each month if it is still
229 *ukuthomba* or it is called that once off if you are starting.

230 F: Oh okay. Alright, thank you so much, number 6. Are there others who have other names?
231 [Slight silence by participants]
232 F: **Okay, how do women usually keep track of their periods, for them to know that they are about**
233 **to start their periods?**
234 [Participants raised their hands]
235 [Chuckles by participants]
236 **F: Yes, number 3. I have noted you, number 4, number 1 and number 7.**
237 P3: Not for me, but my mom, she used to say that when she still had her periods, she would tell with a
238 moon. So, every time when there is a full moon, she knew that she is about to go on her periods.
239 **F: So, she would go outside and look at how is the moon?**
240 P3: She says are periods went along with the moon.
241 **F: Okay, thank you, number 3. Yes, number 4.**
242 P4: I can feel it by having **islumo** [Meaning: It is a Zulu word directly translated as menstrual cramps].
243 **F: Mhm [Neutral].**
244 P4: It is a lot; it is very hard. It is like I am pregnant, maybe there is a baby. Like, I even crawl on my
245 knees if I have it. I can't sleep. Then I would be like let me drink warm water, maybe it takes me even
246 5 days.
247 **F: Mhm [Neutral].**
248 P4: Yeah.
249 **F: The 5 days is before you start your periods.**
250 P4: Yeah, it is before.
251 **F: Okay...**
252 P4: After that it [Meaning: Participant is referring to **islumo**, which is a Zulu word directly translated as
253 menstrual cramps] becomes quiet and then the blood comes out.
254 **F: Okay...Yes, number 1.**
255 P1: I also feel **islumo** [Meaning: It is a Zulu word directly translated as, menstrual cramps]. I have pains,
256 on my bladder and end up drinking Grandpa, 3 or 4. It happens 2 days before my periods.
257 **F: Mhm [Neutral], okay. Yes, number 7. I have noted you, number and number 3.**
258 P7: Before I go on periods, I first have **islumo** [Meaning: It is a Zulu word directly translated as,
259 menstrual cramps]. They start 3 days after. I don't know if it is a coincidence, there is this person that I
260 don't like.
261 [Chuckles by participants]
262 P7: There is this person that I don't like, it is the always the one person, it is always my brother.
263 **F: That's when you know that you are about to start periods.**
264 P7: Yes.
265 **F: Okay, alright, number 5. Yes, number 5.**

266 P5: At home, they notice me by seeing me having moods at that time. Especially mom, she can see if I
267 am about to start periods. She says, “no, these days you are unapproachable, you have moods, why?
268 Are you about to start your periods?”. Then 3 days would pass with those moods, then the periods start.
269 We see from there.

270 **F: Okay, thank you, number 5. Yes, number 3. I have noted you, number 6.**

271 P3: My [menstrual] cramps are like 2 weeks before and then I have [menstrual] cramps during my
272 periods. But it is never like a few days before I start periods.

273 **F: Okay, number 3. Yes, number 6. I have noted you, number 2.**

274 P6: Okay, mine is different if I am listening to others because things such as **islumo** [Meaning: It is a
275 Zulu word directly translated as, menstrual cramps] and moods, I don't know.

276 **F: Mhm [Neutral].**

277 P6: So, what helps me is that I count for myself. Like, I know that my cycle is 28 days.

278 **F: Mhm [Neutral].**

279 P6: If I start today to go on periods, it becomes day 1 for me, so, I will count like that until day 28 sure
280 case the periods will come back again.

281 **F: Oh okay, when you are counting, number 6 you use the calendar. What do you use?**

282 P6: I can also use the calendar but since today it is the 28th//

283 **F: //Mhm//**

284 P6: //It is day 1.

285 **F: Mhm [Neutral].**

286 P6: So, I can balance things out with the calendar or say 29, 1, 2, 3, 4, 5, 6, 7, 8 until 28 days is completed
287 that I am counting with my hand.

288 **F: Oh okay...**

289 P6: Yeah.

290 **F: Alright, okay thank you, number 6. Yes, number 2, I have noted you, number 7.**

291 P2: I think since it is me, maybe I will have 2 pimples next to the cheek. Then maybe a week won't
292 finish without being on my menstrual periods. But when 1 day is left, then I will have **islumo** [Meaning:
293 It is a Zulu word directly translated as, menstrual cramps] that day. Even then, it is not **islumo** [Meaning:
294 It is a Zulu word directly translated as, menstrual cramps], really, it is more like a back pain.

295 **F: Mhm [Neutral].**

296 P2: Then when I am on my menstrual periods, no, I don't have any back pains shame.

297 **F: Okay, thank you so much , number 2. Yes, number 7.**

298 P7: Please may I ask, speaker number 6.

299 **F: Mhm [Yes].**

300 P7: That she said she counts her cycle herself.

301 **F: Mhm [Neutral].**

302 P7: It sometimes happens that your cycle changes, isn't.

303 **F: Mhm [Neutral].**

304 P7: So, how do you deal with that?

305 P6: That's why when she [Meaning: Participant is referring to the interviewer] said do I count using the
306 calendar, I didn't want to agree. Because I won't say that since today it is the 28th, my periods are 28
307 days and next month it will be the 28th, because February has short days//

308 P7: //It has short days//

309 P6: //So, I count day by day, it [Meaning: Participant is referring to the month] will say the date of the
310 28th, when is it. I don't count dates, I count days. You see on the 28th, I will say day 1, 28, 29, if it is
311 there, then 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 and when it says 28, I will go and check on the calendar that which
312 date will it be. The dates changes but it will always be 28 days, it doesn't change.

313 P7: Mhm [Neutral].

314 P6: Yeah.

315 **F: Okay, thank you so much, number 7 and number 6. Yes, number 3.**

316 P3: My periods are irregular.

317 **F: Mhm [Neutral].**

318 P3: Sometimes I get them twice a month, sometimes I don't get them at all. So, I even tried an app, Flo.

319 **F: What is it called?**

320 P3: Flo.

321 **F: Flo, please spell it for me.**

322 P3: F-l-o.

323 **F: Oh okay...**

324 P3: I was trying to track my periods. But it was not able to help me. So, I usually see with – its either it
325 is cramps, or I will see with periods that okay I am on periods. If they are not there that month, it means
326 I am not getting them.

327 **F: Oh okay. So, the app was not able to help you because your periods are irregular.**

328 P3: Mhm [Yes].

329 **F: Okay, and then with the app it is just Flo and then there is nothing else, it is that word only.**

330 P3: Mhm [Yes].

331 **F: Okay, thank you so much, number 3 for the interesting information.**

332 [Participant raise her hand]

333 **F: Yes, number 6.**

334 P6: Please may I comment on speaker number 3. I think since she mentioned that maybe it is twice a
335 month. So, this is what I was talking about that we don't look at the month, you count the days.

336 **F: Mhm [Neutral].**

337 P6: So, since February was short, you might find that march will start early because a month has 28
338 plus, you find that you will start at the beginning of march. And then again, when march ends, I repeat
339 because my 28 days are finished even though February was short.

340 **F: Mhm [Neutral].**

341 P6: I think it is something like that dear, that I do.

342 **F: Okay, thank you. Thank you so much, number 6. Thank you again for all your responses. So**
343 **that we all have the same understanding for the rest of the discussion, when we are talking about**
344 **menstrual cycle, when we are talking about the monthly cycles women usually have. This includes**
345 **the days of the month when you are bleeding, the time just before you bleed, the time just after**
346 **bleeding, and other times of the month in between. So, when we are talking about menstrual cycle,**
347 **we are talking about that. Are we all still good?**

348 Yes! [All participants responded at once]

349 **F: Now, I would like you to think about how your own menstrual cycles have changed while using**
350 **a contraceptive, the changes can be changes that you liked or changes that you didn't like. I will**
351 **ask you questions now. There are questions that I will ask you that are about this. Okay, first,**
352 **please tell me about any ways contraception has changed how often you have bleeding. Here we**
353 **are looking at, for an example, is it bleeding that comes more often or less often than before using**
354 **a contraceptive? How was your bleeding. So, we will look at that, did your bleeding come more**
355 **often or less often than before using contraception? Maybe we can compare that before we used**
356 **a contraception, it came more often or less often and after using a contraception, did it come more**
357 **often or less often?**

358 [Participants raised their hands]

359 **F: We will start with speaker, number 1. I have noted you, speaker number 3, 4, 5, 6 and 7.**

360 P1: I, before I started getting injected [Meaning: Participant is referring to the contraceptive injection].
361 I would go for 3 days well, with periods that were well. They didn't come more often and didn't come
362 less often. I started getting injected [Meaning: Participant is referring to the contraceptive injection],
363 the injection for 3 months, I would not go on periods for one month and only go the second month. And
364 even when I would go on periods the next month, I would go on periods for a long time. I would go on
365 periods for the whole week. And even so, in that week, the 1st day they [Meaning: Participant is referring
366 to menstrual blood] are a lot and on the last they day are small. Then it is drops. Then the following
367 month, the 3rd one, I would not go on them [Meaning: Participant is referring to periods]. So, that's how
368 it changed. Because it has changed, before, I would go on periods well for 3 days and now that I am
369 getting injected [Meaning: Participant is referring to the contraceptive injection], I would go on periods
370 for 7 days in the second month.

371 **F: Okay, so, before you used something for contraception, were there days – let's say in month**
372 **you would go on your periods for 3 days as you have mentioned right, did it happen that you**
373 **would go on your periods for another 3 days on the same month or it was just 3 days for that**
374 **month only?**

375 P1: It was 3 days for that month only.

376 **F: Oh okay. Okay, thank you so much, number 1. Yes, number 3.**

377 P3: For me, before I started contraception, my periods lasted for 5 days. First and second day was a
378 heavy flow and then on the other days it is just normal. Now, since I am – okay, so, I started off with
379 the depo. The depo, I got injected with it, the first 2 months I spotted the whole time. And after that,
380 when I was done with spotting, a brown discharge came out, it was like I completing my [menstrual]
381 periods.

382 **F: Mhm [Neutral].**

383 P3: For a very long time, I went to the clinic, and they said that's normal, it will discontinue itself. So,
384 I went to [Name of store] , I brought **cranberry** supplements to drink, to clean. Uhm, then it stopped, I

385 didn't get my [menstrual] periods. And then I changed back to IUD because coming back every 2
386 months for an injection, it didn't make sense because it is not like I want a baby anytime soon. So, I
387 inserted an IUD, the hormonal one.

388 **F: Mhm [Neutral].**

389 P3: Uhm, I inserted it in December 11. I have been spotting since, it is not stopping.

390 **F: Okay, alright, thank you so much, number 3. So, in this question, just to remind you, we want**
391 **to find out if your bleeding comes less often or more often. So, we are not looking at how much**
392 **you bleed. Because if we are looking at how much you bleed, we are looking at the volume and**
393 **how much blood comes out. But here, we are trying to find out if your periods come less often or**
394 **more often, you see.**

395 P3: Yes.

396 **F: So, for some it happens that in a month, she would go on her menstrual periods twice. Which**
397 **means she will be on her menstrual periods for 3 days and then again, the following week do**
398 **another 3 days, you see that? We are looking at that now.**

399 P3: Which means what I can say is that I don't go on my periods, I spot only.

400 **F: Mhm [Neutral].**

401 P3: So, since I used a contraceptive, my periods are small.

402 **F: Mhm [Neutral].**

403 P3: Yeah.

404 **F: Oh okay. Before you started contraception, how many days were your periods?**

405 P3: They were 5 days.

406 **F: They were 5 days. After you had started contraception, then you didn't go on your [menstrual]**
407 **periods?**

408 P3: Mhm [Yes].

409 [Participant raised her hand]

410 **F: Alright, okay. Thank you so much, number 3. Number 4.**

411 P4: Before I was on contraception, my periods were 3 days.

412 **F: Mhm [Neutral].**

413 P4: But they had blood clots.

414 **F: Mhm [Neutral].**

415 P4: So, maybe on the 3rd day, they [Meaning: Participant is referring to blood clots] would come out a
416 little bit. But 2 days, there are blood clots. When I started the injection [Meaning: Participant is referring
417 to the contraceptive injection], maybe it might happen that on that month I bleed a little bit and the
418 bleeding, on the first day I keep seeing drops, maybe on the panty and then change and bath and insert
419 a pad. And I will insert it [Meaning: Participant is referring to the sanitary pad] the whole day. Then
420 end up seeing a drop for that time. Maybe the following day it will then be quiet [Meaning: The
421 participant won't have any menstrual periods or spotting] again. Maybe the following day it will start
422 all over again.

423 **F: Mhm [Neutral].**

424 P4: But not this way [Meaning: Participant meant that her periods flow wouldn't be the same as before].

425 **F: Oh okay. Okay, then when you were using a contraceptive, before and after?**

426 P4: Right now, since I am on contraception//

427 **F: //Mhm [Neutral]//**

428 P4: //I do have [menstrual] periods. Right now, I am on periods//

429 **F: //Mhm [Neutral]//**

430 P4: //But I can stay with the [sanitary] pad that I have inserted until I leave, get home and stay the whole

431 day because it [Meaning: Participant is referring to the menstrual blood] is coming out a little bit.

432 **F: Okay...**

433 P4: Yes.

434 **F: How many times do you spot in a month? Like, do you complete your days and spot again the**

435 **following week or you complete those days only?**

436 P4: It is only for those days. Maybe since I have started at midnight, maybe tomorrow it will discontinue.

437 **F: Okay.**

438 [Participant raised her hand]

439 **F: Alright, speaker number 5.**

440 P5: When I started going on my [menstrual] periods, I would go on periods for 3 days before I inserted

441 the implant. I would go on menstrual periods for 3 days. Even then, I started my [menstrual] periods

442 late. I started when I was 19 years, when I was old. So, I went on periods old, I would go on periods

443 for 3 days, 3 days, 3 days. Then in 2021, I inserted an implant. Then things changed, I started going on

444 menstrual periods for 7 days. I started to have a lot of blood.

445 **F: Mhm [Neutral].**

446 P5: Yet my blood used to be a little bit. I would go on periods for that time, a little bit, even then for 3

447 days. It is just that the blood was little. I inserted an implant and that changed, I went on periods month

448 after month. Sometimes I would not go on periods on other months. Maybe let 2 months pass, other

449 months I would go on periods a lot [Meaning: The participant meant that she would bleed more days].

450 There would be a lot of blood. Maybe 14 days would pass while on periods. So, yeah that is how it

451 changed for me. But I initially went on periods for 3 days and then I inserted an implant. That is how I

452 would go on my periods until I removed it.

453 **F: Okay...**

454 P5: Yes.

455 **F: Thank you so much, number 5. Are there any of you that have experienced something like**

456 **number, 5 when they had started to use a contraception? Maybe you find that this month she will**

457 **go on her periods and next month does not go on her periods and so forth.**

458 Yes! [Participants responded and agreed]

459 **F: Maybe//**

460 [Participant raised her hand]

461 **F: //Yes, number 1.**

462 P1: It is me, just like I had explained initially that I would go on periods this month. I would go on
463 periods for 7 days, the following month I wouldn't go on periods.

464 **F: Mhm [Neutral].**

465 P1: I would go on periods again the following month. The time when I go on periods again, I will go
466 on periods for 7 days and they won't flow a little bit, they would flow a lot.

467 [Participant raised her hand]

468 **F: Alright, thank you. Yes, number 7.**

469 P7: I, before I used the depo. I would go on periods for 3 days. I would be alright, have menstrual
470 cramps, my menstrual cramps are not bad.

471 **F: Mhm [Neutral].**

472 P7: And then ever since I used the depo, I would track when I have menstrual cramps that I am about
473 to go on periods. It would happen that I would skip 2 months without going on periods and then when
474 I go on periods I would go for 7 days and come out a lot of [menstrual] blood.

475 **F: Mhm [Neutral].**

476 P7: Yes...

477 **F: Okay, so, your periods don't come more often after using a contraception.**

478 P7: Yes.

479 **F: Before you used a contraception, you would go on periods every month?**

480 P7: I would go on periods every month, yes.

481 **F: But this time around there are months that you go on periods and there are months that you
482 don't go on periods.**

483 P7: Yes.

484 [Participant raised her hand]

485 **F: Yes, number 6.**

486 P6: Before I inserted an implant, I would go on periods for 7 days.

487 **F: Mhm [Neutral].**

488 P6: So, since I had mentioned earlier that I was able to count my thing that sure case on this day. After
489 inserting an implant, it started to change. I continued to count the normal way, when the day came
490 [Meaning: Participant is referring to the day to start periods], it was quiet [Meaning: Participant means
491 that she didn't have periods]. So, I ended up forgetting. Maybe after 5 days after the day I had expected
492 the discharge to come.

493 **F: Mhm [Neutral].**

494 P6: When I expected that after a discharge periods will come out, it would be quiet [Meaning:
495 Participant means that she didn't have periods] again for 2 days. After days, you find that I spot, you
496 will have a blood drop that will say, *cho* [Meaning: It is a Zulu expression that is the sound of a drop
497 any liquid. In this context the participant is referring to the blood drop]. You rush and go to insert a pad.
498 You will end up taking it out [Meaning: Participant is referring to the sanitary pad] as she [Meaning:
499 Participant is referring to the other participant] had mentioned.

500 **F: Mhm [Neutral].**

501 P6: So, I first waited, that thing happened to me for 2 weeks, because I wanted to see what was going
502 to happen. It was 2 weeks, after 2 weeks it finished and got normal. I stayed and waited to see when
503 will the following ones [Meaning: Participant is referring to menstrual periods] start. It went on and on
504 and I was always on the lookout because I don't feel menstrual cramps, you see. I must wipe and look
505 [Meaning: Participant doesn't experience menstrual cramps, therefore only sees if she has menstrual
506 blood or doesn't, once she has wiped her vagina] .

507 **F: Mhm [Neutral].**

508 P6: This time around it came again. Until the 2 weeks finished again. I won't say it was 2 weeks per
509 say, because it will be today, maybe skip 2 days and insert the pad. Then when you have not inserted
510 the pad, because it is hot and you are relaxing, then there is blood again and you panic. So, we live
511 painfully with this thing. Or if you must come out of the house, you insert a pad and maybe you insert
512 it for nothing because you don't know when it [meaning: Participant is referring to menstrual periods]
513 will come. You must always stay waiting. So, they come less often than usual but for a longer time.

514 **F: Mhm [Neutral].**

515 P6: Yeah.

516 **F: Okay, when you say for a longer time, you mean your days increase.**

517 P6: They are longer, since I used to go on periods for 7 days normally.

518 **F: Mhm [Neutral].**

519 P6: So, this spotting took about 2 weeks. And I ended up not being able to keep count.

520 **F: Oh okay...**

521 P6: Yeah.

522 [Participant raised her hand]

523 **F: Alright, thank you so much, number 6. Number 2.**

524 P2: Before I got injected [Meaning: Participant is referring to the contraceptive injection] and used the
525 contraceptive, I would go on my periods maybe 4 days and even then, it would be light. Like it would
526 be light because I didn't use pads, I used pantyliners. Then when I was on contraception, I think I would
527 go twice a month on periods. Sometimes I would go three times on periods, because there would be a
528 difference with 3 days. That means that if I went on periods for 4 days, I would stay for the following
529 3 days, and nothing would happen. Then after 3 days it would start all over again. And it is the same, it
530 becomes light, not that it will be heavy that much.

531 **F: Mhm [Neutral], okay. So, your volume is still the same, but the frequency has changed?**

532 P2: Mhm [Yes].

533 **F: Alright. Thank you so much, number 2. Is there someone who has maybe used a contraception
534 and then stopped using it and then maybe the periods also stopped?**

535 [Participants raised their hands]

536 **F: Yes, number 3. I have noted you, number 6 and number 7.**

537 P3: So, when I was using a depo, there was a time where I stopped using it. And my periods didn't
538 come back.

539 **F: Mhm [Neutral].**

540 P3: For quite some time, I think 6 months.

541 **F: Mhm [Neutral].**

542 P3: Because I was not in a relationship and then I got in a relationship again, I then decided to go and
543 get injected [Meaning: Participant is referring to the contraceptive injection].

544 **F: Mhm [Neutral].**

545 P3: When I was getting injected [Meaning: Participant is referring to the contraceptive injection], I
546 started all over again and spotted when I was getting injected when I was not getting my periods. I just
547 got confused.

548 **F: Mhm [Neutral].**

549 P3: So, yeah.

550 **F: Alright, number 3. Yes, number 6.**

551 P6: Yeah, I also tried the depo and the injection [Meaning: Participant is referring to the contraceptive
552 injection] for 2 months. I am not sure what is it called.

553 **F: Mhm [Neutral].**

554 P6: So, I did the same thing until I decided to stop it.

555 **F: Mhm [Neutral].**

556 P6: And I heard that an injection [Meaning: Participant is referring to the contraceptive injection] stays
557 in the blood. When I stopped it [Meaning: Participant is referring to the contraceptive injection], I got
558 pregnant fast. But the periods were not back to being normal, it was just spotting. Something like that.

559 **F: Okay...**

560 P6: Yeah...

561 **F: Okay, yes number 7.**

562 P7: I first was on contraception with the 2 months injection.

563 **F: Mhm [Neutral].**

564 P7: I didn't go on my periods at all after getting the 2 months injection, since 2023 November until last
565 year.

566 **F: Mhm [Neutral].**

567 P7: I didn't go on periods almost the whole year. So, I decided to discontinue it. I discontinued it, after
568 that I went on periods from December.

569 **F: Mhm [Neutral].**

570 P7: Think December 5, until it was January on periods.

571 [Participant raised her hand]

572 **F: Okay.**

573 P7: Yes.

574 **F: Alright, thank you so much, number 7. Yes, number 2.**

575 P2: Before, I used to use an implant. So, it treated me well shame, because I seldomly went on my
576 periods. Three months would finish, and it would be quiet [Meaning: Participant means that 3 months

577 would finish without having periods], you see. And I didn't complain. Then when I had taken it out
578 when it was time//

579 **F: //Mhm [Neutral]//**

580 P2: //Then I decided to pause a bit being on contraception to see if my blood will get back and it didn't.
581 Then I decided to go on contraception with the injection for 3 months. Then it got back to normal.

582 **F: Alright, thank you so much, number 2. We will continue with our discussion. Please tell me**
583 **about any ways contraception has changed how regularly you have bleeding.**

584 [Slight silence by participants]

585 **F: Here we are looking at if it is bleeding that comes when you expect it or it is bleeding that**
586 **comes when you don't expect it.**

587 [Participants raised their hands]

588 **F: Yes, number 6. I have noted you, number 5 and 1.**

589 P6: It comes anytime, we can't say we are expecting it. We just see with them [Meaning: Participant is
590 referring to menstrual periods] coming.

591 **F: Mhm [Neutral].**

592 P6: Yeah.

593 **F: Okay, thank you so much, number 6. Yes, number 5.**

594 P5: I, my goodness I would just see with them [Meaning: Participant is referring to menstrual periods]
595 here, the periods.

596 **F: Mhm [Neutral].**

597 P5: Maybe after 3 months, I would see periods. You find that it was quiet and didn't go on them
598 [Meaning: Participant is referring to menstrual periods]. I would see with them [Meaning: Participant
599 is referring to menstrual periods] showing up. I get confused as to where do they come from because
600 they quiet. Then I will go on periods for 7 days or 14 days, and end up going to the clinic, you see. It
601 becomes something like that.

602 **F: Okay...**

603 P5: Yeah.

604 **F: Okay, thank you so much, number 5. Yes, number 1.**

605 P1: I also would just see the periods coming out of the blue. They start even when I am at [Name of the
606 mall].

607 [Chuckles by participants]

608 **F: They start even when you are where?**

609 P1: They have started even at [Name of the mall] when I was sitting.

610 **F: Where is [Name of the mall].**

611 P1: At the mall, at [Name of place].

612 **F: Oh okay.**

613 P1: I would start periods unexpectedly. And even then, the flow is not small. They [Meaning: Participant
614 is referring to menstrual periods] come heavy and a lot.

615 **F: Okay, thank you so much, number 1. Number 1, 5 and 6, I heard you mention that it is hard**
616 **to predict when they will start because they start unexpectedly.**

617 P6: Yes.

618 **F: But when they have started, can you tell when they will stop?**

619 P6: No, I can't anymore//

620 **F: Yes, number 6. I have noted you, number 1 and number 5.**

621 P6: I can't tell anymore when they will stop. As I have mentioned that one minute you are happy that
622 they are finished, after two days they come back.

623 **F: Mhm [Neutral].**

624 P6: So, you can't be comfortable at the end, you must always have a pad inserted since the girl
625 [Meaning: Participant is referring to one of the participants] mentioned that they started at the mall.

626 **F: Mhm [Neutral].**

627 P6: So, we live with pads since we - I have inserted an implant.

628 **F: Mhm [Neutral].**

629 P6: Yeah.

630 **F: Okay, thank you so much, number 6. Yes, number 5.**

631 P5: For me, my goodness! Ay shame! The periods would just come randomly. Then when I have been
632 on periods for a long time, I ended up going to the clinic. I lived by drinking the pills that are small to
633 stop them [Meaning: Participant is referring to menstrual periods] because the blood was not stopping
634 at all. I didn't know what to do. I ended up going to the clinic, they gave me pills that are small that
635 they say are for preventing pregnancy. They told me to drink 1, maybe it [Meaning: Participant is
636 referring to menstrual blood] will stop. It would stop at that time, and it would start all over again. So,
637 I ended up not knowing when my periods stop and when they start, you see.

638 **F: Okay...**

639 P5: Yeah.

640 **F: So, did this continue to bother you even when you had used the pill [Meaning: Participant is**
641 **referring to the contraception pill]?**

642 P5: They would stop, they would stop for maybe 2 weeks.

643 **F: Okay, after drinking the pill?**

644 P5: Yes, after drinking the pill. Maybe they would stop for 2 weeks and start all over again. When it
645 starts all over again, it will be 3 days. After the 3 days, they stop straight and don't come anymore until
646 2 months passes by and then they come back again.

647 **F: Okay, which color are the pills?**

648 P5: They are white and then there is a red place, red buttons.

649 **F: Mhm [Neutral].**

650 P5: They are small, they are the small white ones. They are the ones that they would give me, one
651 packet.

652 **F: Mhm [Neutral].**

653 P5: Mhm [Yes], they also didn't tell me how to take the pills. I would take it anyhow.

654 **F: Okay, I heard you mention red buttons, the red buttons are part of the pill, or it is the packing?**

655 P5: They are on the side. You see, how do I put it, it is one package.

656 **F: Mhm [Neutral].**

657 P5: They are on the side; they are next to each other and then the white ones are in the middle.

658 **F: Mhm [Neutral].**

659 P5: Mhm [Yes].

660 **F: Alright, thank you so much, number 5. Yes, number 1.**

661 P1: For me, they happen for 7 days. They have never been more or been less. And they have never

662 stopped. Once I have started, I have started. You know the red that is clear, yoh! [Meaning: It is an

663 expression, which is used if someone is shocked or in disbelief]

664 F: Mhm [Neutral].

665 P1: Then they look like they are black and then they are like green!

666 **F: Mhm [Neutral].**

667 P1: It was just something like that.

668 **F: Okay, so, number 1 you can tell when they will stop.**

669 P1: Yes.

670 **F: Okay, thank you so much. We will continue with our next question. Please tell about any ways**

671 **contraception has changed how long you have bleeding. For example, when you have bleeding,**

672 **how many days does it last? Is it longer or shorter than before using contraception? So, here we**

673 **are looking at before you used a contraception, how many days did you bleed and after using a**

674 **contraception, how many days did you bleed. We are looking at that difference.**

675 [Participants raised their hands]

676 **F: Yes, number 7. I have noted you, number 6 and 1.**

677 P7: Before I was on contraception, I would bleed for 3 days to 4 days. It wouldn't be more than that.

678 When I was contraception, I would bleed for 7 days.

679 **F: 7 days.**

680 P7: Yes.

681 **F: Alright. Okay, thank you so much, number 7. Yes, number 6.**

682 P6: I would say it takes a long time.

683 **F: Mhm [Neutral].**

684 P6: But the blood flow is light. The difference is that normally the blood flow was moderate. I knew

685 that if it is 3 days, maybe I will change pads 2 times a day. Now, the time is longer. I insert 1 pad per

686 day. Maybe you find that I will spot once until I change it because I am going to sleep. I would wake

687 up and it is clean. And then again it says, "nqwambi" [It is a Zulu word that describes the sound of a

688 drop or something falling. In the context the participant is referring to the blood drops coming out]

689 following day.

690 **F: Okay...**

691 P6: Yeah.

692 **[Participants raised their hands]**

693 **F: Thank you so much, number 6. Yes, number 1. I have noted you, number 3 and number 4.**

694 P1: I, before I would go on menstrual periods for 3 days, periods that were well, they were light. Now,
695 I go on menstrual periods for 7 days. Even at night, I sometimes wake up with blood all over the bed. I
696 start all over again and wash.

697 **F: Mhm [Neutral].**

698 P1: So, you see now, it has changed a lot.

699 **F: Okay, thank you so much, number 1. Yes, number 3.**

700 P3: I would go for 5 days, before, and then I got on contraception, I then spotted for almost 2 months,
701 spotting.

702 **F: Okay, how many days did you spot?**

703 P3: It was constant.

704 **F: Mmh [Pardon].**

705 P3: It was constant, it didn't stop.

706 **F: Oh okay. Okay, so, you couldn't keep track that you spot how many days.**

707 **[Participant nodded to say yes]**

708 **F: Okay. Alright, thank you so much, number 3, number 4.**

709 P4: For me, before it would be 3 days. As I had explained earlier that it was 3 days with blood clots. I
710 got injected [Meaning: Participant is referring to the contraceptive injection], I started to have spots.
711 Even then, maybe it will be today and then tomorrow there is nothing. The following day it would start.
712 But maybe in a month, maybe it is 3 times or twice.

713 **F: Okay, thank you so much. Please may you have this in mind that, I know that these questions**
714 **sound like they are repetitive//**

715 P4: //Yes//

716 **F: //And they are similar, you see. Please be patient with me. We want to make sure that we get**
717 **all the information from each of you guys. Uhm, okay, so our next question is – okay, when you**
718 **have bleeding, how does contraception change how much you bleed during those days? Okay, so,**
719 **here we are looking at volume. We are looking at if you have more bleeding or less bleeding? And**
720 **please may we look at that before you used a contraception, were you bleeding heavier and maybe**
721 **after you used a contraception you were bleeding lighter. We want to get that; we are looking at**
722 **the volume.**

723 **[Participants raised their hands]**

724 **F: Right, we will start with speaker number 7. Number 6, number 5, number 3, number 2, and**
725 **number 1, I have noted you.**

726 P7: Before I was contraception, it was normal. It was 3 days, the first day you would bleed heavily and
727 then it will decrease as the 3 days continued.

728 **F: Mhm [Neutral].**

729 P7: That is normal. When I was laughing, I would bleed heavily.

730 **F: Mhm [Neutral].**

731 P7: Yeah, I would bleed heavily. I am not a person who has a lot of blood. So, when I was on
732 contraception, I was a person who was bleeding a lot with blood clots until 7 days and then I would be
733 alright.

734 **F: Okay, yes number - sorry number 6. Number 7, would you say before you used a**
735 **contraception, your periods were medium, their volume.**

736 P7: Their volume.

737 **F: And then after using a contraception, they were heavy.**

738 P7: Mhm [Yes].

739 **F: Okay, thank you so much, number 7. Yes, number 6.**

740 P6: Mine have decreased.

741 **F: Mhm [Neutral].**

742 P6: Even though I don't know, because I say that the spotting is for 2 weeks, maybe it ends up covering
743 the volume. But it has decreased because normally you will insert a pad in the morning, then it is full
744 by this time, you are changing the pad.

745 **F: Okay...**

746 P6: Now, I change it late.

747 **F: Mhm [Neutral].**

748 P6: So, it has decreased, it doesn't come heavily.

749 **F: So, before you used a contraception, were they normal or?**

750 P6: I think they were normal.

751 **F: They were medium.**

752 P6: Yeah.

753 **F: Okay, after using a contraception//**

754 P6: //They became less//

755 **F: //They became light.**

756 P6: Yeah. Yeah.

757 **F: Thank you so much, number 6. Yes, number 5.**

758 P5: Before, I would go for 3 days. Even then, 3 days wasn't a lot of blood. I told myself that maybe I
759 have small blood, you see. The blood didn't fill the [sanitary] pad. It was blood that I could stay the
760 whole day with it, you see.

761 **F: Mhm [Neutral].**

762 P5: I wouldn't change the [sanitary] pad. Even then, I would go on periods, 3 days.

763 **F: Mhm [Neutral].**

764 P5: I then inserted the implant. But it first treated me well, I don't want to lie. Then as time went on, I
765 started having a lot of blood. I would come out blood clots. I would wake up and the bed would be dirty.

766 **F: Okay [Neutral]...**

767 P5: You see, I couldn't even feel it when it is coming because I would see with my legs, if I am standing
768 the blood would be full on the pad and running down my legs and so forth, you see. Which means that
769 there was a lot of blood.

770 **F: Okay, before you used a contraception, would you say they were medium?**

771 P5: Yeah, I would say so.

772 **F: Okay, and then after using a contraception they became heavy.**

773 P5: Yes.

774 **F: Okay, thank you so much, number 5. Yes, number 3.**

775 P3: Okay, so, before I was on contraception my periods were 5 days. And mine were heavy. But it
776 happened that after an hour my pad would be full.

777 **F: Okay [Neutral]...**

778 P3: I must change it. Then I changed and used tampons.

779 **F: Mhm [Neutral].**

780 P3: The tampons would hold the blood longer. So, I would say 2 hours on my first 2 days. And then the
781 other days they are less, maybe I will use 2 tampons. And then now when I am on contraception, since
782 I am spotting, I am using pantyliners.

783 **F: Mhm [Neutral].**

784 P3: Sometimes it has that I use 2 pantyliners and they would become full, from spotting that day or
785 sometimes it is just one pantyliner.

786 **F: So, your periods before you started contraception, they were heavy.**

787 P3: Mhm [Yes].

788 **F: After you started contraception, you were spotting, they were light.**

789 P3: Yes.

790 **F: Alright, thank you so much, number 3. Yes, number 2.**

791 P2: I think they are alike, because before I prevented, they were already light. They were that time, if
792 they are 3 days, they are 3 days. After I prevented [Meaning: Participant is referring to preventing
793 pregnancy, using a contraception method], I think they are still light. But the difference would be that
794 maybe it will take 2 weeks for them to finish.

795 **F: Mhm [Neutral].**

796 P2: Yes.

797 **F: Okay. Alright, thank you so much, number 2. Yes, number 1.**

798 P1: Mine before, I would say they were medium, they were well. Now when I am getting injected
799 [Meaning: Participant is referring to the contraceptive injection], they are heavy.

800 **F: Okay, thank you so much, number 1. We will move on to our next question. Looking at how**
801 **your bleeding looks during your periods. How has contraception changed what your blood looks**
802 **like?**

803 [Participants raised their hands]

804 **F: Yes, number 1. I have noted you, number 5.**

805 P1: Mine, before it was red. It was red.

806 **F: Mhm [Neutral].**

807 P1: Now, it is red, the bright red that looks like it is black though.

808 **F: Mhm [Neutral].**

809 P1: Yes.

810 **F: Oh okay. Did you have blood clots?**

811 P1: Before, I didn't have them. Now I have them.

812 **F: You have them, are they small blood clots or it is the big ones?**

813 P1: It is the big ones, to such an extent that even when they come out, I can feel them.

814 **F: Mhm [Neutral].**

815 P1: I become wet.

816 **F: Alright, thank you so much, number 1. Yes, number 5.**

817 P5: I would say mine wasn't that much red. It was blood that was like it is weak.

818 **F: Mhm [Neutral].**

819 P5: You see, when I was still going on periods for 3 days. But when I was preventing [Meaning:
820 Participant is referring to preventing pregnancy, using a contraception method], it changed, it had blood
821 clots. It even changed the color, and it was like it is brownish sometimes.

822 **F: Mhm [Neutral].**

823 P5: Sometimes it would be very red, you see.

824 **F: Mhm [Neutral].**

825 P5: But it would be thick blood, it wasn't the same as before, you see. It was something like that.

826 **F: Okay, thank you so much, number 5. Yes, number 3. I have noted 4 and number 2.**

827 P3: So, before I was on contraception, my periods were very red.

828 **F: Mhm [Neutral].**

829 P3: And then since – and I used to have blood clots. Since I am on contraception, it is very light. Close
830 to - you can say that they are close to pink, the way they are so light. Blood clots come out, but they are
831 very small.

832 **F: Mhm [Neutral].**

833 P3: And it is not all the time, it is seldomly.

834 **F: Alright, thank you so much, number 3. Yes, number 4.**

835 P4: Mine, before they were red.

836 **F: Mhm [Neutral].**

837 P4: The periods, but blood clots came out.

838 **F: Mhm [Neutral].**

839 P4: They were like round and black.

840 **F: Mhm [Neutral].**

841 P4: Even then, when I go to the toilet, I see it that time, there is a clot, and I even think that maybe the
842 stomach is coming out or what is happening.

843 **F: Mhm [Neutral].**

844 P4: But now, it [Meaning: Participant is referring to the menstrual blood texture] is light, I don't see the
845 blood clots anymore. But it is blood that is light.

846 **F: Mhm [Neutral].**

847 P4: Yes.

848 **F: Okay. Alright, when you say the stomach is coming out, what does it mean?**

849 P4: I don't know how it comes out; I would get frightened that the way it is happening//

850 **F: //If you were to explain to an individual, how would you explain the stomach coming out.**

851 P3: Miscarriage [Participant is whispering and speaking softly]

852 P4: Maybe an individual is having a miscarriage.

853 **F: Oh okay, I hear you. Thank you so much, number 4. Yes, number 2. I have noted you, number**
854 **6.**

855 P2: I think it is the same. I have never had blood clots come out. They are light, light, before and after,
856 it is the same.

857 **F: Oh okay. So, number 2, her periods were light. They were light red.**

858 P2: Mhm [Neutral].

859 **F: Before and after using a contraception.**

860 P2: Yes.

861 **F: Okay, thank you so much, number 2. Yes, number 6. I have noted you, number 7.**

862 P6: For me, before it was the normal red.

863 **F: Mhm [Neutral].**

864 P6: And after inserting this thing for preventing [Meaning: Participant is referring to preventing
865 pregnancy, using a contraception method], it keeps changing. It happens that it becomes dark red, the
866 strong one.

867 **F: Mhm [Neutral].**

868 P6: And then it changes itself and becomes pinkish.

869 **F: Mhm [Neutral].**

870 P6: And then it is like a brownish discharge. A lot of things happen at the same time.

871 **F: Mhm [Neutral].**

872 P6: As I have mentioned that I spot, this comes, that comes, this comes.

873 **F: Mhm [Neutral], okay. Did you have clots?**

874 P6: Sometimes.

875 **F: You used to have them before using a contraception method?**

876 P6: Yes.

877 **F: Now you don't have them.**

878 P6: No, it is just blood. It is just that it is strong [Meaning: Participant is referring to the color of the
879 blood], but it is inconsistent.

880 **F: Oh okay, when you say it is not inconsistent, what do you mean?**

881 P6: It is not a clot.

882 **F: Oh...**

883 P6: It is strong, but a clot is something that you can hold like this. It is consistent but it is watery but
884 thick.

885 **F: Oh, it is thick...**

886 P6: Yes.

887 **F: Okay, and then the color of it is what kind of red?**

888 P6: If it is going to be like that, it becomes dark red.

889 **F: Alright.**

890 P6: If it is not like that, it happens that it becomes pinkish.

891 **F: Pinkish...**

892 P6: Light, mhm [Yes].

893 **F: And then before contraception.**

894 P6: Before I used a contraception, since I am going on periods for 7 days, first 2 days was a discharge
895 that was brownish and as it continued, then 4 days it becomes a blood that is normal, that is red.

896 **F: Okay...**

897 P6: Again, when I am about to finish, it becomes a discharge that is brown.

898 **F: Alright, okay. Thank you so much, number 6. Yes, number 7.**

899 P7: For me, it was the same. It was dark red.

900 **F: Mhm [Neutral].**

901 P7: The difference is that the clots before I was on contraception, they were normal, the small ones.

902 **F: Mhm [Neutral].**

903 P7: Now, they are big. They are a lot.

904 **F: Mhm [Neutral].**

905 P7: Yes.

906 **F: Alright, okay. Thank you so much, number 7. Please may I ask, you see when you are on your
907 menstrual periods, besides the blood that you see, is there maybe a fluid that you have seen?**

908 [Participants raised their hands]

909 **F: Yes, number 6. I have noted you, number 5.**

910 P6: Yes, it does happen that a discharge comes that is like yellow.

911 **F: Mhm [Neutral].**

912 P6: It is like yellow. And then as it continues, it wants to be brown.

913 **F: Mhm [Neutral].**

914 P6: Mine is a lot, mine keeps changing.

915 **F: Mhm [Neutral], the discharge that is yellow that you have mentioned, happens during your**
916 **periods or before or after?**

917 P6: When I was still having my periods normal, it would happen before. Now since I have inserted the
918 implant, it happens in between since I mentioned that it is becoming on and off.

919 **F: Mhm [Neutral].**

920 P6: Maybe it comes first 2 days. And then it becomes blood that is normal.

921 **F: Mhm [Neutral].**

922 P6: And then it goes back to the discharge.

923 **F: And the discharge that is yellow, how is its texture?**

924 P6: It is thick.

925 **F: It is thick.**

926 P6: Yes.

927 **F: Alright, thank you so much, number 6.**

928 [Participant raised her hand, number 7]

929 **F: Yes, number 5. I have noted you, number 7.**

930 P5: For me, it would come out something like mucus. But they were not thick, you see.

931 **F: Mhm [Neutral].**

932 P5: They were like light, whitish. But they were not white, white, white, white! But it was like it is
933 white, you see. It was like it is mucus. But it would come out after I have completed the periods. Mhm
934 [Yes], it came out when I had completed periods.

935 **F: Alright, okay, thank you so much, number 5.**

936 [Participant raised her hand, number 3]

937 **Yes, number 7, I have noted you, number 3.**

938 P7: My discharge was brown.

939 **F: Mhm [Neutral].**

940 P7: It is the same as the white one. It is normal like, it is normal, but the difference is that it is brown
941 after being on periods.

942 **F: Okay, when you say it is normal, what makes you say it is normal even though it is brown?**

943 P7: I mean it doesn't become thick.

944 **F: Mhm [Neutral].**

945 P7: Yes.

946 **F: Oh okay. How is it?**

947 P7: It becomes [Chuckles, participant mumbling and inaudible], like it doesn't become thick. If it is not
948 thick, how it is it, I don't know.

949 P6: It is also not runny like water.

950 P7: Mhm [Yes], it is just.

951 **F: I heard number 6 say it is not runny like water. So, it is not thick, and it is not like water, it is**
952 **moderate.**

953 P7: Mhm [Yes], it is moderate.

954 **F: Alright, thank you so much, number 7. Yes, number 3.**

955 P3: So, mine changes whenever it feels like. It becomes thick and brown. Sometimes it is like it is water,
956 but it is brown. Like light brown. So, those are the discharges that I get.

957 **F: Okay, so, since you are saying it happens that it comes out like it is water and it is brownish//**
958 P3: //Mhm//

959 **F: //Is it something that happens before or after your periods?**

960 P3: I don't get periods. So, I was spotting for 2 months, then I stopped spotting. This charge, when I
961 look at it, I think I am meant to be on periods but then my body doesn't go on my period and then it
962 takes out a discharge.

963 **F: Okay, alright. Thank you so much, we will move on to our next question. Can you please tell**
964 **me how contraception has changed your menstrual cramps. So, before you used a contraception**
965 **method, how were the menstrual cramps and then after having started to use the contraception**
966 **method, how were the menstrual cramps.**

967 [Participants raised their hands]

968 **F: Yes, number 2. I have noted you, number 3, number 5 and number 4.**

969 P2: I think with me they are the same, because I have lower back only for like a day and then the
970 following day I go on my menstrual periods. It is still the same with me till now.

971 **F: So, before you used a contraception method, you would have a lower back pain and after you**
972 **had started//**

973 P2: //Yes.

974 **F: Okay, thank you so much, number 2. Yes, number 3.**

975 P3: My crumps were very painful to a point that I would sleep on the bed. And I had the lower back
976 pain before I was on contraception. And then since I am on contraception, I have cramps randomly. But
977 then again, they are not as bad as before I was on contraception.

978 **F: Mhm [Neutral].**

979 P3: I can tolerate them. And they don't last that long. Maybe it is a few seconds then they stop.

980 **F: Okay, alright. Thank you so much, number 3. Yes, number 5.**

981 P5: I had **islumo** [Meaning: it is a Zulu word that is directly translated as menstrual cramps], I would
982 have it and sleep the whole day. It would be painful even the lower back, I would be nausea. I wouldn't
983 be able to do anything for a long time. Maybe 2 days or 3 days, before I start periods. Yet, at the
984 beginning, before I inserted the contraceptive, I didn't feel **islumo** [Meaning: it is a Zulu word that is
985 directly translated as menstrual cramps] at all, I would see with periods and being moody, that's all.

986 **F: Okay. Alright, thank you so much, number 5.**

987 [Participants raised their hands]

988 **F: Yes, number 4. I have noted you, number 7 and number 6 and number 1.**

989 P4: Before, I got injected, **islumo** [Meaning: it is a Zulu word that is directly translated as menstrual
990 cramps] affected me a lot.

991 **F: Mhm [Neutral].**

992 P4: As I had mentioned, I even crawl on my knees and can't sleep.

993 **F: Mhm [Neutral].**

994 P4: The way it is so painful on my lower back.

995 **F: Mhm [Neutral].**

996 P4: But now, it is not bad. It is not bad.

997 **F: What is the difference? Would you say that there is a difference with the amount of pain, it is
998 not painful a lot anymore?**

999 P4: It is there but it is not as painful as before.

1000 **F: Oh okay.**

1001 P4: Because you would even wish to vomit, before. Now it is better.

1002 **F: It is better.**

1003 P4: Yes.

1004 **F: **Islumo** [Meaning: it is a Zulu word that is directly translated as menstrual cramps] at the
1005 beginning, did you experience it a lot more days?**

1006 P4: Yes, they were a lot.

1007 **F: Now have they decreased.**

1008 P4: Yes, they have decreased a lot.

1009 **F: Okay, thank you a lot, number 4. Yes, number 7.**

1010 P7: Before I was on contraception, I would experience **islumo** [Meaning: it is a Zulu word that is directly
1011 translated as menstrual cramps] for a few days since I also would go on periods for a short period. After,
1012 no, it is a long time, I experience **islumo** [Meaning: it is a Zulu word that is directly translated as
1013 menstrual cramps] for a long time. It does happen that I even experience it even when I am done with
1014 periods.

1015 **F: And then before, since you experienced them for a few days, how painful were they as
1016 compared to now?**

1017 P7: The pain is the same.

1018 **F: They are the same.**

1019 P7: Yes, they are the same for me.

1020 **F: Alright, thank you, number 7. Yes, number 6.**

1021 P6: For me, **islumo** [Meaning: it is a Zulu word that is directly translated as menstrual cramps], I didn't
1022 have it before and even now I don't have it. I think that affects me because now I only see with blood,
1023 yet before, before I prevented [Meaning: Participant is referring to preventing pregnancy, using a
1024 contraception method], I was able to count my thing [Meaning: Participant is referring to her menstrual
1025 cycle].

1026 **F: Alright...How do you feel about not having **islumo** [Meaning: it is a Zulu word that is directly
1027 translated as menstrual cramps]?**

1028 P6: I don't know if I am normal
1029 [Chuckles by everyone]

1030 P6: You see what they [Meaning: Participant is referring to the rest of the participants] are saying, I
1031 don't know it. Now I am asking myself why me.

1032 **F: Okay, alright thank you, number 6. Yes, number 1.**

1033 P1: Before contraception, I would experience **islumo** [Meaning: it is a Zulu word that is directly
1034 translated as menstrual cramps] the whole day. I couldn't eat, I would even get annoyed.

1035 **F: Mhm [Neutral].**

1036 P1: But now, I just see periods, I don't have **islumo** [Meaning: it is a Zulu word that is directly translated
1037 as menstrual cramps]. I just see them starting.

1038 **F: Oh, you don't have **islumo** [Meaning: it is a Zulu word that is directly translated as menstrual
1039 cramps] now?**

1040 P1: No.

1041 **F: But before you used to experience it for one day.**

1042 P1: It was one day but it would be the whole day until I went to sleep.

1043 **F: Alright. Okay, in this question, I would like to ask number 3 and number 5, that **islumo**
1044 [Meaning: it is a Zulu word that is directly translated as menstrual cramps] – let's start with
1045 maybe, number 3. Would you say the days of having **islumo** [Meaning: it is a Zulu word that is
1046 directly translated as menstrual cramps] are shorter or longer when you compare before and
1047 after?**

1048 P3: So, before they were long and then after they were short.

1049 **F: Oh okay. Alright, is there a difference with the pains?**

1050 P3: Mhm [Yes], before they were painful a lot and now, they are better.

1051 **F: Alright. Okay, thank you so much, number 3. Number 5.**

1052 P5: Before, I never used to have **islumo** [Meaning: it is a Zulu word that is directly translated as
1053 menstrual cramps] at all.

1054 **F: Mhm [Neutral].**

1055 P5: I would see with periods.

1056 **F: Mhm [Neutral].**

1057 P5: But after, **islumo** [Meaning: it is a Zulu word that is directly translated as menstrual cramps]started.
1058 I would have a bladder that is painful, the lower back, nausea, all that, it would be a lot.

1059 **F: Alright. Okay, thank you so much. Are you still good?**

1060 Yes! [Participants agreed all at once]

1061 **F: Alright, anyone who would like to drink water can drink it, be comfortable. So, while we were**
1062 **continuing with our discussion, our note taker [Name of note taker number 2] was writing notes**
1063 **on the cards. Please can we turn and look at our cards, let us look at the things we were talking**
1064 **about now. Okay, we started that side and said, “how often you bleed”. We said, “less often than**
1065 **before”. We said, “experiences no bleeding”. We said, “more often than before”. We went on and**
1066 **said, “how regularly we bleed”. We said, “irregular cycle”. We said, “unpredictable cycle”. Is it**
1067 **all still good?**

1068 Yes! [Participants agreed all at once]

1069 **F: We then said, “how long you bleed. 5 days”, other said, “consistent spotting”, others said, “3**
1070 **days, consistent spotting”, others said, “3 days before / after. 2 to 3 times a month, irregular**
1071 **bleeding”. Others said, “before it was 3 days and then after 7 it was 7 days”. Others said, “before**
1072 **it was 3 – 4 days”, others said, “it is 7 days”. Is there anything that we left out?**

1073 Mhm [No] [Participants response]

1074 **F: Okay, we looked at how you bleed. Others said, “before it was medium flow”, others said,**
1075 **“after it was heavy flow”. Others said, “before it was light flow and then after it was constant**
1076 **spotting”. And than others said, “before it was heavy flow and then after it was spotting or light”.**
1077 **And another one said, “before it was light flow, after it was heavy flow”. Another one said, “before**
1078 **it was medium, normal flow. After it was light flow”. Another one said, “before it was medium,**
1079 **normal flow. After it was heavy flow”. Is there anything that we have left out?**

1080 No! [Participants response]

1081 **F: Okay, we then looked at how your blood looks. Others said, “it was dark red, pink, brownish”.**
1082 **Others said, “light red, almost pink”. Others said, “brownish color, bright red”. Others said,**
1083 **“bright red, almost black color”. Others said, “clots”. Others said, “light red”. Others said,**
1084 **“yellow to brownish discharge”. Uhm, others then said, “slippery, white fluid”. Is there anything**
1085 **that we have left out?**

1086 Mhm [No] [Participants response]

1087 **F: Okay, then we looked at menstrual cramps. We said, “experiences no cramps, cramps got**
1088 **better, less pain”. Others said, “cramps stayed the same”. Others then said, “cramps got worse”.**
1089 **Is there anything that we have left out, or everything is right?**

1090 It is right. [Participants response]

1091 **F: Alright. Are there any other ways contraception has changed your menstrual cycle that we**
1092 **have not spoken about yet?**

1093 [Slight silence from participants as a form of saying no]

1094 **F: Have we spoken about all of it?**

1095 Yes [Participants response]

1096 **F: Okay, now all these menstrual changes, how have they made your body feel?**

1097 [Participant raised her hand]

1098 **F: Yes, number 5.**

1099 P5: I lost weight.

1100 **F: Mhm [Neutral].**

1101 P5: I was fat.

1102 **F: Mhm [Neutral].**

1103 P5: I prevented [Meaning: Participant is referring to preventing pregnancy, using a contraception
1104 method] and lost weight.

1105 **F: Mhm [Neutral].**

1106 P5: I lost weight almost 3 years because I had inserted it [Meaning: Participant is referring to an implant]
1107 for 3 years.

1108 **F: Mhm [Neutral].**

1109 P5: So, during my 3 years whilst I had inserted the implant, my body wasn't the same as before. I was
1110 a slender and people were asking me what happened because I was fat. But you won't explain to people
1111 what you are facing at that time.

1112 **F: Mhm [Neutral].**

1113 P5: Mhm [Yes], I can now say that the body is getting back but it hasn't gotten back to shape properly.

1114 **F: Mhm [neutral].**

1115 P5: Yeah.

1116 **F: Okay, number 5. How does that make you feel?**

1117 P5: It made me feel bad because people asked what is eating me. Why is my body not the same as
1118 before? Why I am I not fat anymore? But then again, I was happy that I am no longer fat.

1119 **F: Mhm [Neutral].**

1120 P5: Because other people are mean when you have a big body.

1121 **F: Mmh [Neutral],**

1122 P5: So, I can say it made me feel bad but at the same time it was right, my body isn't big anymore, you
1123 see.

1124 **F: Mhm [Neutral].**

1125 P5: Mhm [Yes], it is not heavy.

1126 **F: Alright. Thank you so much. Thank you for sharing, number 5. Yes, number 2. I have noted
1127 you, number 1.**

1128 P2: I think before I was a slender, like really. Now I am fat.

1129 **F: Mhm [Neutral].**

1130 P2: Mhm [Yes], because I don't have a figure.

1131 **F: How does that make you feel?**

1132 P2: Bad.

1133 **F: Mhm [Neutral].**

1134 P2: Yeah, but if you look at it on another side it is right, you see.

1135 **F: Why do you say so?**

1136 P2: Just, I have gained. Like, change of clothes, everything.

1137 [Chuckles by everyone]

1138 **F: Okay...**

1139 P2: Mhm [Neutral].

1140 **F: Alright. Okay and then the energy, has there been any changes in terms of your energy from**
1141 **your observations.**

1142 P2: No, I am still lazy, even now.

1143 [Chuckles by everyone]

1144 **F: So, before you used a contraception you were lazy.**

1145 P2: Yes.

1146 **F: And after.**

1147 P2: Even now.

1148 [Chuckles by everyone]

1149 **F: Alright, thank you so much. Yes, number 1.**

1150 P1: Before, I was a slender my goodness. Now I can see that I am gaining weight. And that doesn't
1151 make me feel good because by my home they think I am pregnant and the problem is that 9 months
1152 finishes and I don't have a baby.

1153 **F: Mhm [Neutral].**

1154 P1: That saddens me.

1155 **F: Mhm [Neutral].**

1156 P1: But then again, I am alright.

1157 **F: Alright, okay, thank you so much, number 5. I have noted you, number 7 and number 3. Sorry,**
1158 **number 1. Thank you, number 5, there is a question that I would like to ask you. Earlier on you**
1159 **spoke about that when you are about to start , your mom can see that you have moods and so**
1160 **forth, maybe can you say that periods or the contraception that you are using makes you have**
1161 **moods and makes changes in terms of your emotions and all of that?**

1162 P5: No, now it is not like before.

1163 **F: It is not the same.**

1164 P5: No, it is not the same. I don't have moods. You can't tell – even though I don't live with my mother
1165 anymore because she was the one who noticed that thing. I can say that I see myself normal.

1166 **F: Okay...**

1167 P5: I wouldn't know with the people that I live with now//

1168 **F: //Yes...[Neutral]//**

1169 P5: //That how do they see me if I am about to go on my periods. But my mother was able to see me,
1170 because I was living with her.

1171 **F: Okay, while you were still living with your mother, did you use contraceptives?**

1172 P5: No.

1173 **F: Oh okay, how does that make you feel, that you don't have moods since you are using this**
1174 **contraceptive?**

1175 P5: Uhm, it makes me happy because they would say, "oh she has started to be on her periods, don't
1176 pay attention to her".

1177 **F: Mhm [Neutral].**

1178 P5: You see, they would say, "oh she has started, don't pay attention to her". So, now I am alright, I
1179 don't have any moods. So, everyone understands me. In the beginning there was that. Especially with
1180 me since I am born with boys [Meaning: Participant is referring to her brothers]. They didn't understand
1181 that they must leave me alone just because I am on my periods. They didn't know that. It was my mother
1182 that understood something like, and would say, "let her be, she is on her periods, that's why she is like
1183 this, you see".

1184 **F: Yes [Neutral]...**

1185 P5: Mhm [Yes].

1186 **F: Okay, thank you so much, number 5. Yes, number 3 and number 7. Please may we start with**
1187 **number 7 and then go back to number 3.**

1188 P7: Ever since I used the depo, I eat and sleep.

1189 **F: Mhm [Neutral].**

1190 P7: The day doesn't end without me sleeping, once I eat, I sleep. I must go to bed.

1191 **F: Okay...**

1192 P7: This saddens me because at home they will think I am pregnant and say, "every time you eat and
1193 sleep".

1194 **F: Mhm [Neutral].**

1195 P7: Yes.

1196 **F: Okay, thank you, number 7. Yes, number 3.**

1197 P3: It also gave me a lot of appetite and I am gaining weight. My mother recently asked me why my
1198 breasts are this big.

1199 [Chuckles by participants]

1200 P3: You have gained weight, why. Until a certain time finished and she saw that there is no pregnancy.
1201 She even told me that she thought I am pregnant, but she can see that it is because I am gaining weight.

1202 **F: Mhm [Neutral].**

1203 P3: Yeah, so, gaining weight, I like it, but I don't like it because I have love handles now. I have a
1204 stomach [Meaning: Participant means that she now has doesn't have a flat stomach since she has
1205 gained].

1206 **F: What are love handles?**

1207 P3: It is the fat that you have here on the sides [Participant pointed to the left and right sides of her
1208 stomach].

1209 [Chuckles and mumbling by participants]

1210 **F: Okay...Alright, what made your mom think that you are pregnant, was it the weight gain?**

1211 P3: It was the weight gain.

1212 **F: Mhm [Neutral]. Alright, thank you so much, number 3. Yes, number 6.**

1213 P6: For me, it has not changed a lot, but I feel like I am pregnant. Have you heard of pregnancy cravings?

1214 It is like I could eat a certain thing.

1215 **F: Mhm [Neutral].**

1216 P6: And then I try to avoid them, because I am sure if I am going to entertain hunger, this thing makes

1217 you hungry and obviously I will gain weight. So, I live by water. I try to eat normally 3 times a day.

1218 But if you really entertain this thing, it says, "take out meat in the fridge and fry it".

1219 [Chuckles by participants]

1220 **F: Now, do you really take out the meat?**

1221 P6: No, if that was the case then how big would I have been?

1222 [Chuckles by participants]

1223 **F: [Chuckles] Thank you, number 6. Yes, number 2.**

1224 [Participant is nodding to say no, she has not raised her hand]

1225 **F: I thought you had raised your hand.**

1226 P2: No...

1227 **F: Alright, is there anyone else that would like share before we continue?**

1228 [Slight silence by participants]

1229 **F: Alright, thank you so much. How have all these menstrual changes impacted your day – to -**

1230 **day life?**

1231 [Participant raised her hand]

1232 **F: Yes, number 3.**

1233 P3: What I can say is that since I started contraception, I'd say my sex drive is lower.

1234 **F: Yeah [Neutral].**

1235 P3: Yeah [Yes], that's the only thing I have noticed.

1236 **F: Okay, and does that affect your relationship?**

1237 P3: [Chuckles] Yeah, it does.

1238 **F: Mhm [Neutral].**

1239 P2: *Hawu* [Meaning: It is a Zulu expression for being surprised or shocked].

1240 P3: Why are you saying *hawu*? [Meaning: It is a Zulu expression for being surprised or shocked]

1241 [Chuckles] It does, because my partner feels like I am less attracted to him as compared to before

1242 because I used to want sex a lot then I do now.

1243 **F: Mhm [Neutral].**

1244 P3: So, it does.

1245 **F: Mhm [Neutral] and how does that make you feel?**

1246 P3: Well, it doesn't make me feel good because I must reassure him that I still feel the same way even
1247 though I am just not in the mood. So, sometimes to be in the mood even if he is not expecting it just to
1248 make him know that I still feel the same way.

1249 **F: Mhm [Neutral].**

1250 P3: So, it doesn't make me feel good.

1251 [Participant raised her hand]

1252 **F: Okay, thank you, number 3. Yes, number 5.**

1253 P5: I thought that my feelings aren't there anymore.

1254 [Chuckles by participants]

1255 **F: What made you tell yourself that?**

1256 P5: If I am sitting with my partner, I couldn't be on [Meaning: To be "on" is a slang saying which means
1257 to be horny"] that way.

1258 **F: Mhm [Neutral].**

1259 P5: Even if he is touching me, my body didn't respond.

1260 **F: Mhm [Neutral].**

1261 P5: There was a difference that was there, others even recommended certain things because they thought
1262 that it is because maybe my feelings aren't there anymore, you see.

1263 **F: Mhm [Neutral].**

1264 P5: I would even say that I am not frequent on things that pertain sex and all of that, you see.

1265 **F: Mhm [Neutral].**

1266 P5: Then it was that he understands that maybe it is because I am preventing [Meaning: Participant is
1267 referring to preventing pregnancy, using a contraception method]. I am also trying for the body to get
1268 used to it, you see.

1269 **F: Mhm [Neutral].**

1270 P5: For it to try and adjust from everything.

1271 **F: Okay. So, it affects you in your relationship.**

1272 P5: Yeah, a lot.

1273 **F: How?**

1274 P5: He didn't understand, he thought that maybe I don't like him anymore. And he thought that maybe
1275 I am in another relationship, that there is someone better that I feel better than him, you see.

1276 **F: Yeah [Neutral].**

1277 P5: Yeah [Yes].

1278 **F: Thank you so much, number 5. Is there someone else that would like to share?**

1279 [Participant raised her hand]

1280 **F: Yes, number 6.**

1281 P6: I would like to add to this thing of feelings. Feelings get finished, shame. So, you end up doing it,
1282 doing it for the partner, the sex.

1283 **F: Mhm [Neutral].**

1284 P6: But you don't enjoy anything really, it is just for him to at least be happy. But you are not in that
1285 space.

1286 **F: How did that affect you in your relationship?**

1287 P6: We wouldn't know, maybe people have gone outside [Meaning: Participant means that maybe her
1288 partner has gone out to find another partner outside of their relationship] because now [Chuckles].

1289 [Chuckles by everyone]

1290 P6: It is like you really don't like the person and stuff, as I have said, you end up pretending trying to
1291 hold your partner to not go outside while you are there.

1292 **F: Okay, to those who said it doesn't make them feel well because it is as if they don't like their
1293 partners and all of that. Have they told you that they don't feel well about not doing sex the way
1294 it used to be done, or they don't say anything?**

1295 [Participant mumbling and inaudible]

1296 **F: Yes, number 5.**

1297 P5: I just feel guilty and assume that he will end up seeing other people, you see.

1298 **F: Mhm [Neutral].**

1299 P5: Since my body doesn't react if he touches me, you see. So, now I think he can see but he won't say
1300 anything, you see.

1301 **F: Mhm [Neutral].**

1302 P5: Mhm [Yes].

1303 **F: Alright, number 5, yes number 3.**

1304 P3: My partner has said that my sex drive – well I don't get horny as I used to.

1305 **F: Mhm [Neutral].**

1306 P3: So, it was a matter of – he felt like there is something that he is doing wrong, or I am not feeling
1307 him the same, my feelings have changed. So, it is those concerns.

1308 **F: Mhm [Neutral].**

1309 P3: Yeah [Yes].

1310 **F: Alright, okay thank you. Apart from relationships, have your periods affected you in terms of
1311 at home or chores that you do at home or at work or maybe in terms of costs to maintain your
1312 mental health, you know. Things like that.**

1313 [Participant raised her hand]

1314 **F: yes, number 1.**

1315 P1: At home, they thought I had terminated a pregnancy because my periods came heavy. Clots would
1316 come out and when I showed my mother, she would say, "are you not terminating a pregnancy since
1317 you are bleeding". I would tell her that no, maybe it is just growing up. I would sometimes lie to her if
1318 there were people.

1319 **F: Alright, okay. Thank you, so, while we were having our discussion, our note taker [Meaning:**
1320 **Note taker number 2] was writing the things that we were talking about. Please can we look at**
1321 **them. We spoke about how changes make your body feel. We said, “low sex drive”. Others said,**
1322 **“gained weight”. Others said, “lost weight”. Others said, “body feels tired, always sleeping”.**
1323 **Others said, “experiences cravings”. Is there anything that we left out?**

1324 No! [Participants response]

1325 P3: Is it not gained appetite.

1326 **F: Mmh [Pardon].**

1327 P3: Appetite, like you gained more appetite.

1328 **F: Okay, we can add that. That you gained more appetite, we will add it. Thank you, number 3.**

1329 [Note taker added the card]

1330 **F: Then we looked at how changes impact your daily life, right. We then said, “uncomfortable**
1331 **questions from people when they see her”. We said, “pregnancy speculations make her feel bad”.**
1332 **We said, “low sex drive affects her relationship”. Is there anything else that we have left out?**

1333 No [Participants response]

1334 **F: Okay. Right, so, thank you so much. Are you still good?**

1335 Yes! [Participants response]

1336 **F: Alright. Okay, so, there is an activity that we are going to do now. Please can we be comfortable,**
1337 **if we would like to drink water, we may drink them. We will do an activity called body mapping.**
1338 **If we turn and look there, we can see that there is a body. There is a front of the body of a woman.**
1339 **There is a front and the back. Right, the activity that we will be doing together, we will be doing**
1340 **it to show the things we encountered with regards to menstrual cramps and any pain that we**
1341 **experienced while using a contraception method. I will give each of you stickers and ask you to**
1342 **place the stickers on the poster, anywhere on the body where you felt menstrual cramps or any**
1343 **pains that you have felt while you were using a contraception method during your menstrual**
1344 **cycle. Stickers have different colors, each for different methods of contraception. Okay//**

1345 [Participant raised her hand]

1346 **F: //Yes, number 3.**

1347 P3: On how the changes make your body feel, I forgot to mention that there was a time where my
1348 breasts were heavy.

1349 **F: Mhm [Neutral].**

1350 P3: For like a very long time. Like, before I was on contraception, it was a sign that I will go on my
1351 menstrual periods. It will be for maybe one 1 day. And then after that they would be heavy even for the
1352 whole week.

1353 **F: Mhm [Neutral].**

1354 P3: It [Meaning: Participant is referring to the whole week] would finish, and my breasts would be
1355 heavy.

1356 **F: Okay, we can add that the breasts were heavy. Just right before you started your periods,**
1357 **right?**

1358 P3: Mhm [Yes].

1359 [Note taker, number 2 added the card]

1360 **F: Alright. Oaky, thank you so much, number 3. So, in our activity that we are doing now, an**
1361 **individual will get a sticker and paste it. There are questions that I will ask you and then direct**
1362 **you as to how we will do this activity. Okay, please can is anyone who has used pills or is using**
1363 **pills for contraception to stand up or raise their hands. Let me see them first.**

1364 P5: Please may I ask, the pills that I have spoken about.

1365 **F: The contraceptive pills,**

1366 P5: Yes, I am asking about them.

1367 **F: You were using them to//**

1368 P5: //to stop//

1369 **F: //to stop the periods but you were not using them for//**

1370 P5: //For preventing [Meaning: Participant is referring to preventing pregnancy, using a contraception
1371 method]//

1372 **F: //For contraception, right.**

1373 P5: Mhm [Yes].

1374 **F: Okay, so, no one used contraceptive pills?**

1375 [Participants are silent, meaning the response is no]

1376 **F: We will move forward, please can anyone who uses the injection raise her hand.**

1377 P3: Before or currently?

1378 **F: Before and currently.**

1379 [Participants raised their hands]

1380 **F: Okay, we will start with number 1. I have noted you, number 2, 3, 4, 5 and 7. We will stand up**
1381 **as you go and place the sticker in front. When she comes back, another one will stand and place**
1382 **it and so forth.**

1383 [Movements of participants placing the stickers on the poster]

1384 **F: You are allowed to place the sticker in front and at the back.**

1385 P3: You said this is during contraception?

1386 **F: Yes.**

1387 P3: Okay.

1388 [Movements of participants placing the stickers on the poster]

1389 **F: For the pains, when placing our stickers, we place them where it is painful. It can be menstrual**
1390 **cramps or any other pains that you experience while you are on your periods due to the**
1391 **contraceptive method you are using or that you have used.**

1392 [Movements of participants placing the stickers on the poster]

1393 P6: Me, my goodness, I haven't felt anything.

1394 [Chuckles by everyone]

1395 **F: [Chuckles] Number 6!**

1396 P6: I would be lying.

1397 [Movements of participants placing the stickers on the poster]

1398 **F: Alright, okay. Thank you so much. We will continue, is there anyone who is using an implant**
1399 **or who has used the injection?**

1400 [Participants raised their hands]

1401 **F: Yes, number 2, number 5 and number 6.**

1402 [Movements of participants placing the stickers on the poster]

1403 **F: Okay, we are still placing the stickers where we experienced pain because of using an**
1404 **implant.**

1405 [Movements of participants placing the stickers on the poster]

1406 **F: Okay, thank you so much. Oh, number 6, you have used an implant but there is no pain that**
1407 **you have experienced.**

1408 P6: No, I have had a headache, but I won't say it is due to the implant. I think it was a normal
1409 headache, that anyone can experience because it was for a short while and then I was alright.

1410 **F: Okay, thank you so much, number 6. Is there anyone who has experienced any kind of pain**
1411 **during their menstrual periods because of using an IUD?**

1412 [Participant raised her hand]

1413 **F: Yes, number 3**

1414 [Movement of participant placing a sticker on the poster]

1415 **F: Okay, is there anyone who has used anything that we haven't spoken about now?**

1416 [Slight silence by participants]

1417 **F: Okay. Alright, thank you so much. Please can we take the gold stickers, the stars there, right.**
1418 **We will place it on one spot anywhere on the body where you experience the utmost pain, where**
1419 **you can say it is the spot that bothers you the most on the body when you are on your periods**
1420 **due to a contraception method that you are using.**

1421 [Movements of participant placing the stickers on the poster]

1422 **F: Okay, thank you so much. Number 4, I can see that you didn't stand up, why?**

1423 P4: It is not too painful and don't have pains a lot since I am on the injection, it has decreased a lot.

1424 **F: Oh...**

1425 P4: Yes, because my periods are short.

1426 **F: Okay. Thank you so much, number 4. Okay, so, I can see there that there are stickers that we**
1427 **have placed on the body parts here on the body. Let's start here at the top, which word would**
1428 **you use to describe this place, to the one who placed a sticker here, what do we call this area of**
1429 **the body?**

1430 **Ikhanda!** [Meaning: It is a Zulu word directly translated as it is the head] [Participants response].

1431 **F: Please may we raise our hands.**

1432 [Participant raised her hand]

1433 **F: Yes, number 5.**

1434 P5: **Ikhanda** [Meaning: It is a Zulu word directly translated as it is the head].

1435 **F: Okay, and then here, what do you call this place on the body.**

1436 [Participant raised her hand]

1437 **F: Yes, number 5.**

1438 P5: Breasts, **amabele** [Meaning: It is a Zulu word directly translated as breasts].

1439 **F: Okay, breasts, amabele. What do you call this place here?**

1440 [Participant raised her hand]

1441 **F: Yes, number 3.**

1442 P3: **Isinye** [Meaning: It is a Zulu word directly translated as it is a bladder].

1443 **F: Isinye. Everyone who placed stickers here, do they agree with number 3 that it is isinye?**

1444 Yes! [Participants response]

1445 **F: Alright okay, thank you. What do we call this place on the body? We are at the back of the**

1446 **body now. What do we call this place on the body?**

1447 [Participant raised her hand]

1448 P2: **Ingalo** [Meaning: It is a Zulu word directly translated as it is an arm] [Participant speaking softly].

1449 **F: Yes, number 2.**

1450 P2: **Ingalo** [Meaning: It is a Zulu word directly translated as it is an arm].

1451 **F: Ingalo, okay. Thank you, number 2. What do you call this place, this one on the body?**

1452 [Participant raised her hand]

1453 **F: Yes, number 4.**

1454 P4: **Iqolo** [It is a Zulu word directly translated as it is the lower back].

1455 **F: Iqolo, please may I ask that the ones who placed stickers here, are all the stickers here for iqolo**

1456 **or maybe they differ?**

1457 P1: No, **iqolo** [It is a Zulu word directly translated as it is the lower back] [Participant speaking softly].

1458 **F: Pardon, please may we raise our hands.**

1459 [Participant raised her hand]

1460 **F: Yes, number 1.**

1461 P1: It is **iqolo**, the whole of it [Meaning: Participant means that the whole area that had stickers is **iqolo**].

1462 **F: Do we agree with number 1?**

1463 Yes [Participants response]

1464 **F: Alright, okay. Thank you. So, when you placed the sticker here, can you explain which pains**

1465 **did you experience, what was happening?**

1466 [Participant raised her hand]
1467 **F: Yes, number 2.**
1468 P2: The implant, I had inserted it on my left.
1469 **F: Mhm [Neutral].**
1470 P2: So, when I inserted it on the left, I experienced something like the muscle is tense or pulling,
1471 especially when I am about to go on my periods.
1472 **F: Mhm [Neutral].**
1473 P2: It is like it has a cramp.
1474 **F: Oh okay, and then the one who placed a sticker here.**
1475 P5: I have a headache when I am about to go on periods, a lot.
1476 **F: Mhm [Neutral].**
1477 P5: I have a headache.
1478 **F: Okay. Yes, I saw that number 5 you have also placed a sticker here also.**
1479 P5: The breasts were getting swollen, a lot.
1480 **F: Mhm [Neutral].**
1481 P5: They get full, it is like I am breastfeeding, you see.
1482 **F: Mhm [Neutral].**
1483 P5: But nothing would come out, liquid didn't come out.
1484 **F: Okay and the breasts were painful when you were on your periods.**
1485 P5: Yeah [Yes].
1486 **F: Okay, and a headache.**
1487 P5: Yeah [Yes].
1488 **F: Okay. Here, *esinyeni* [Meaning: It is a Zulu word directly translated as at the bladder], please**
1489 **explain which words you would use to explain menstrual cramps.**
1490 [Participant raised her hand]
1491 **F: Yes, number 3.**
1492 P3: It becomes like there is something pulling.
1493 **F: Mhm [Neutral].**
1494 P3: Or there is something tearing apart inside.
1495 **F: Okay, alright. Thank you so much, number 3.**
1496 [Participant raised her hand]
1497 **F: Yes, number 1.**
1498 P1: It feels like you could just be sick and not wake up and just be sick.
1499 **F: Mhm [Neutral].**

1500 P1: Because when you wake up, it is like the waist is pulling.

1501 [Participant raised her hand]

1502 **F: Okay. Yes, number 5.**

1503 P5: It is like you are cutting.

1504 **F: Mhm [Neutral].**

1505 P5: It is like the muscles are pulling.

1506 **F: Mhm [Neutral].**

1507 P5: The muscles don't become right.

1508 **F: Mhm [Neutral].**

1509 P5: Yes.

1510 **F: Okay. Thank you. All of you have explained your experiences when you have menstrual**
1511 **cramps. Are there any words that you know of that explain menstrual cramps that you have heard**
1512 **of?**

1513 [Slight silence by participants]

1514 **F: If you want to explain that you have menstrual cramps, which words do you usually use?**

1515 [Participant raised her hand]

1516 **F: Yes, number 6.**

1517 P6: I have heard them say *islumo* [It is a Zulu word directly translated as menstrual cramps].

1518 **F: *Islumo*.**

1519 P6: Yes.

1520 **F: Oh okay, the word *islumo*, what does it mean? What happens?**

1521 P6: I think that you are aching as they have mentioned. And what they are [Meaning: Participant is
1522 referring to what the other participants who spoke earlier] explaining, I feel if – like it is labor pains so
1523 I am getting confused that they are always feeling such things.

1524 **F: Mhm [Neutral].**

1525 P6: Yeah, it means you ache, have a pulling experience, it is like you could keep bending.

1526 **F: Mhm [Neutral].**

1527 P6: You see.

1528 **F: Alright. Okay, thank you so much, number 6. All of us know of the word, *islumo* only?**

1529 Yes! [All participants responded at once]

1530 **F: Alright, I can see here, the stars *esinyeni* [Meaning: It is a Zulu word directly translated as at**
1531 **the bladder], please can I have an individual that will explain why she says it is the part that is**
1532 **most troublesome here *esinyeni* [Meaning: It is a Zulu word directly translated as at the bladder].**

1533 [Participant raised her hand]

1534 **F: Yes, number 1.**

1535 P1: For me, that is the place that is most troublesome, my bladder. So much so even if I sleep, I feel
1536 like bending my feet and not straighten them. It just becomes painful, I get pulled *esinyeni* [Meaning:
1537 It is a Zulu word directly translated as at the bladder], it gets hard.

1538 **F: Okay, here at the back? Thank you, number 1. Here at the back, there is a star, maybe can the**
1539 **one who placed the star explain what are the reasons for them to say it is the place that is most**
1540 **troublesome?**

1541 [Participant raised her hand]

1542 **F: Yes, number 2.**

1543 P2: I think that if I have a back pain, I can even be absent at school and not attend.

1544 **F: Mhm [Neutral].**

1545 P2: Like, you get irritated even when a person is trying to talk to you. It becomes painful that much,
1546 like you have a burning sensation *eqolo* [Meaning: It is a Zulu word directly translated as at the lower
1547 back].

1548 **F: Mhm [Neutral].**

1549 P2: It is something like that.

1550 **F: Alright, okay. Thank you so much, number 2. Maybe let us go back to the ones who placed**
1551 **stickers here *esinyeni* [Meaning: It is a Zulu word directly translated as at the bladder], who have**
1552 **menstrual cramps. What do you use if you are experiencing this pain?**

1553 [Participant raised her hand]

1554 **F: Yes, number 3.**

1555 P3: What helps me is a hot water bottle.

1556 **F: Hot water bottle, what do you do with it?**

1557 P3: I place *esinyeni* [Meaning: It is a Zulu word directly translated as at the bladder].

1558 **F: And then how does it help you?**

1559 P3: I don't know, but the heat of it makes my cramps better.

1560 [Participants raised their hands]

1561 **F: Alright, okay. Thank you so much. Yes, number 5. I have noted you, number 1 and number 4.**

1562 P5: I soothe with hot water.

1563 **F: Mhm [Neutral].**

1564 P5: I also drink, pain killers.

1565 **F: Mhm [Neutral].**

1566 P5: It becomes better, it slows down.

1567 **F: Oh okay, where do you soothe with hot water on the body?**

1568 P5: I soothe *esinyeni* [Meaning: It is a Zulu word directly translated as at the bladder].

1569 **F: Okay...**

1570 P5: Mhm [Yes], and then it becomes better shame.

- 1571 **F: Okay, thank you so much, number 5. Yes, number 1 and number 4.**
- 1572 P1: I drink **Grandpa** [Meaning: It is the name of the brand for the painkillers]. The **Grandpa** [Meaning:
1573 It is the name of the brand for the painkillers] I drink maybe 4 of them until I am alright.
- 1574 **F: Mhm [Neutral].**
- 1575 P1: If I drink one it is like I am playing.
- 1576 **F: Okay, what is it called that you are drinking? What is it?**
- 1577 P1: A *Grandpa* is a painkiller.
- 1578 **F: Mhm [Neutral], painkiller. Yes, number 4.**
- 1579 P4: I drink painkillers.
- 1580 **F: Mhm [Neutral].**
- 1581 P4: Or boil **amanzi abebtukuntuku** [Meaning: It is a Zulu word that is directly translated as lukewarm
1582 water] and then drink them.
- 1583 **F: What is **amanzi antukuntuku**?**
- 1584 P4: It is warm water.
- 1585 **F: It is warm water.**
- 1586 P4: Yes.
- 1587 **F: Okay...**
- 1588 P4: It lessens then, slowly, slowly.
- 1589 **F: Mhm [Neutral], the painkillers that you drink, what are they called?**
- 1590 P4: **Painblok.**
- 1591 **F: What are they?**
- 1592 P4: They are **Painblok.**
- 1593 **F: They are **Painblok**. Thank you so much. I heard that whilst we were continuing with our
1594 discussion, that some mentioned that when they were using a contraception method the menstrual
1595 cramps decreased, right.**
- 1596 Mhm [Response by participants].
- 1597 **F: Can one person share their experience about that, amongst us.**
- 1598 P5: Please repeat the question.
- 1599 **F: As we continued with our discussion, some of you mentioned that because of method that you
1600 are using for contraception, the menstrual cramps decreased. The pains decreased, the days for
1601 having menstrual cramps decreased. So, please can we share, can one person share her
1602 experience.**
- 1603 P4: It is me.
- 1604 **F: Okay, yes, number 4.**
- 1605 P4: It helped me a lot.
- 1606 **F: Mhm [Neutral].**

1607 P4: The pains that I had; they were bad.

1608 **F: Mhm [Neutral].**

1609 P4: Before, it was very hard.

1610 **F: Yeah.**

1611 P4: I see it better now.

1612 **F: Okay...**

1613 P4: Yes...

1614 **F: Alright, how has that helped you in your life, for you to have this change?**

1615 P4: A lot. It helped me a lot.

1616 **F: Mhm [Neutral]. How so, maybe?**

1617 P4: I don't know what to say [Chuckles].

1618 **F: [Chuckles] Alright. Thank you, number 4. Are we all still good?**

1619 Yes [Participants response, participants sound fatigue]

1620 **F: You sound like you are exhausted. Are you still, right?**

1621 Yes [Participants response]

1622 **F: Alright. For the next few questions, let us look back at all the ways contraception has changed**

1623 **your menstrual cycles. So, today we looked at our body mapping, there. We spoke about**

1624 **menstrual cramps and the pains that we experience. We did cards, cards activity there. We spoke**

1625 **about how often we bleed, how long we bleed. We looked at our blood, how it has changed the**

1626 **way it looks. We spoke about how changes make your body feel. We shared that some of us have**

1627 **lost weight. Some of us have gained weight and all of those things. We looked at how changes**

1628 **impact your daily life. Okay, so, we've discussed all those things that we face when using**

1629 **contraception methods during our menstrual periods, right. So, now, what information did you**

1630 **get from the clinic or healthcare provider about changes to your menstrual cycle before you**

1631 **started being on contraception? What information did you get?**

1632 [Participant raised her hand]

1633 **F: Yes, number 3.**

1634 P3: So, since I was using a depo, when I discontinued it, I didn't want something with hormones,

1635 because of the discharge and not going on periods. I felt like it is not right for my body. So, I went to

1636 ask for an IUD, the copper IUD and then because I am anemic, she said I won't be able to get an IUD

1637 that is copper because I will bleed a lot and that is not going to be good for me. So, they said I must get

1638 the hormonal IUD.

1639 **F: Mhm [Neutral].**

1640 P3: Yeah [Yes].

1641 **F: Okay, and when she explained to you, did she explain to you about it?**

1642 P3: What?

1643 **F: The hormonal IUD.**

1644 P3: Mhm [Yes], she explained to me about it. That it is like depo.

1645 **F: Mhm [Neutral].**

1646 P3: It is just that it releases 52 grams of – I have forgotten the name of the hormone.

1647 **F: Mhm [Neutral].**

1648 P3: In my uterus only.

1649 **F: Okay. And the information that you received, was it helpful?**

1650 P3: Well, it was helpful because she explained that I won't be able to get copper IUD. Even though I
1651 was not happy that I can't get copper because I just wanted to go back to the normal cycle.

1652 **F: Mhm [Neutral].**

1653 P3: So, to get something hormonal I didn't like but then I wanted to prevent [Meaning: Participant is
1654 referring to preventing pregnancy, using a contraception method], so I didn't have a choice.

1655 **F: Oh okay. And these things, did she speak about maybe which side effects will you experience?**

1656 P3: She gave me a pamphlet, a small pamphlet, it had side effects.

1657 **F: Oh okay, and did you experience the things that were written on the pamphlet?**

1658 P3: Yes. Which are mood changes and then it is spotting. Those are the only ones that I experienced.
1659 But like there are a lot because there is also like depression, and I don't experience that.

1660 **F: Mhm [Neutral], okay, thank you so much, number 3. Are there others who would like to share
1661 which knowledge they gained from the clinic?**

1662 [Participant raised her hand]

1663 **F: Yes, number 6.**

1664 P6: I feel like they robbed me at the clinic because they didn't explain anything. The nurse said, "why
1665 don't you take an implant because you will come back after 3 years, instead of inserting a depo, you
1666 will keep coming back".

1667 **F: Mhm [Neutral].**

1668 P6: Then I took that advice, and I inserted the implant. When I had side effects, they became mine.

1669 **F: Mhm [Neutral].**

1670 P6: Yeah.

1671 **F: So, they had not told you about side effects?**

1672 P6: No, they didn't explain. And I asked and said, "I have heard that thing causes heavy bleeding for
1673 others". Then she said, "no if you are bleeding you will come back to us".

1674 **F: Yeah.**

1675 P6: Yeah, it is that.

1676 **F: Have you been to them when you were bleeding? Have you been to them?**

1677 P6: Yes, I went on Monday.

1678 **F: Mhm [Neutral].**

1679 P6: They gave me pills that I also think are for preventing [Meaning: Participant is referring to
1680 preventing pregnancy, using a contraception method].

1681 **F: Mhm [Neutral].**

1682 P6: So, I started them on Monday. I saw it quiet yesterday and today. But I am not sure yet because this
1683 thing skips days, I am continuing with it. I will see what is happening.

1684 **F: Okay, when you went there to get help, this time around did they explain well what are the**
1685 **pills that they gave you, are for?**

1686 P6: Yeah, shame. The one I found there was right because she told me that it's a normal side effect. She
1687 also checked if there is no infection, she said it does happen that you have an infection. She said
1688 everything is right, I must take pills.

1689 **F: Okay, thank you, number 6 for sharing. Okay, is there anyone else that would like to share.**

1690 [Slight silence by participants]

1691 **F: Now, can we please think about all the things we have talked about today. What do you wish**
1692 **they has told you about the changes to your menstrual cycle before you started the method?**

1693 [Participant raised her hand]

1694 **F: Yes, number 3.**

1695 P3: I wish they could tell us what kind of side effects to expect, and this is what you must use. If you
1696 get this, then you must use this. Not for us to see ourselves and then go back to the clinic and say, "I
1697 have this problem, what must I do".

1698 **F: Yeah [Neutral], what information do you think would have made your experience of using**
1699 **these contraceptives that you are using, better? Maybe if they had given you that information,**
1700 **which information do you wish they had given you.**

1701 [Participant raised her hand]

1702 **F: Yes, number 6.**

1703 P6: I think it is right to get into something fully aware that you are expecting 1, 2 and 3 instead of seeing
1704 things happening like you had mentioned dear [Meaning: Participant is referring to participant number
1705 3]. You must go back to the clinic now. At the end we are shying away from going frequently every 3
1706 months, we now come before the 3 months end because of what this [Meaning: Participant is referring
1707 to the contraception method] is doing to us.

1708 **F: Yeah [Neutral]. Okay, yes number 7. Which information.**

1709 P7: I don't have anything to say, what I had wanted to say, they have already said it.

1710 **F: Oh okay.**

1711 P7: Yes.

1712 **F: What is the most important information you would want a friend to know about these changes**
1713 **before starting contraception?**

1714 [Participant raised her hand]

1715 **F: Yes, number 1.**

1716 P1: I wish for her to know that her periods will change my goodness.

1717 **F: Mhm [Neutral].**

1718 P1: They won't be as normal.

- 1719 **F: Mhm [Neutral], alright, okay. What do others say.**
- 1720 [Participants raised their hands]
- 1721 **F: Yes, number 5. I have noted you, number 3.**
- 1722 P5: I wish that there could be a way that if the people have not started to prevent [Meaning: Participant
1723 is referring to preventing pregnancy, using a contraception method], first be told and shown how the
1724 things for preventing [Meaning: Participant is referring to preventing pregnancy, using a contraception
1725 method] treat you. Get into something informed, informed that okay if I use an implant, it will treat me
1726 like this and this. The injection [Meaning: Participant is referring to the contraception injection], if I
1727 use it, it will treat me like this. It mustn't just be a case where they say, "here is an implant, here is an
1728 injection". You get involved and you don't know anything. You are getting caught up in a mess, you
1729 get there and already you don't know, you then get sad, you see.
- 1730 **F: Mhm [Neutral].**
- 1731 P5: I wish that there could be a way for people to tell us first before a person involves themselves in
1732 that thing.
- 1733 **F: Okay, what would you tell your friend with regards to the contraception that you are using?
1734 What information do you think is important for her to know about?**
- 1735 P5: I would tell that – the problem is that the bodies are different. I would tell her that maybe the implant
1736 will treat her like me, yet it might not treat her the way it treated me. I will tell her that friend go and
1737 prevent [Meaning: Participant is referring to preventing pregnancy, using a contraception method] but
1738 know that there are side effects that are like this and this, but I don't know how your body will respond
1739 to that thing at that time.
- 1740 **F: Okay, thank you, number 5. Yes, number 3.**
- 1741 P3: I was going to say the same thing, that I will tell her how my side effects are and that her body
1742 might react differently than to mine. And if she gets to the clinic, she must ask as much questions as
1743 she can.
- 1744 **F: Okay, thank you so much. So, we have reached our last activity. Are we still good?**
- 1745 Yes! [Participants response]
- 1746 **F: Alright. So, in our last activity, we will talk about two questions healthcare providers or
1747 researchers sometimes ask people about their menstrual cycle. I will ask you each question, and
1748 we will take a few minutes to discuss the answers. Okay, please can we all stand.**
- 1749 [Movements of participants standing up]
- 1750 **F: Okay. So, when you last had a period, right. When you last had a period, would you describe
1751 your periods as: Light, moderate, or heavy? Those who say it was light, their last period that they
1752 had, meaning the last time you menstruated, the days that you menstruated on, was it light,
1753 moderate or heavy? Those who say it was light, please raise your hand.**
- 1754 [Participants raised their hands]
- 1755 **F: Okay, number 2, number 3//**
- 1756 P: Sorry, please may I ask, is it light for now when using things for preventing [Meaning: Participant is
1757 referring to preventing pregnancy, using a contraception method]?
- 1758 **F: It is for your last period.**
- 1759 P: Oh okay.

1760 [Participants raised their hands]

1761 **F: Number 2, number 3, number 4 and number 6. Please go that side to that lady.**

1762 [Movements of participants going to stand on one side as the light group]

1763 **F: Okay and then the ones that say, they were medium. Their last period, their last period that**
1764 **they had was medium, please raise your hands.**

1765 [No participants raised their hands]

1766 **F: Those who say they were heavy, please raise your hands.**

1767 [Participants raised their hands]

1768 **F: Okay, number 1, 5 and 7, please stand this side.**

1769 [Movements of participants going to stand on one side as the heavy group]

1770 **F: Let's start with our light group, how did you decide that your last periods were light? Choose**
1771 **one person who will answer.**

1772 [Participant raised her hand]

1773 **F: Yes, number 4.**

1774 P4: I don't understand.

1775 **F: How did you decide on you answer, that your last periods were light? How did you know that**
1776 **they were light?**

1777 P4: I saw them.

1778 **F: Mhm [Neutral], how were they?**

1779 P4: There are spots, they are not very red, it is light. As I had explained before, even now I am periods.
1780 I noticed at midnight.

1781 **F: Mhm [Neutral].**

1782 P4: Yes.

1783 **F: Okay, thank you, number 4. Let's come here, our heavy group. How did you decide on you**
1784 **answer, that your last periods were heavy?**

1785 [Participant raised her hand]

1786 **F: Yes, number 1.**

1787 P1: I saw by having big clots coming out then the ones before. The ones for now were very big. It
1788 [Meaning: The participant is referring to menstrual blood] was black.

1789 **F: What was black?**

1790 P1: It is the color of the blood.

1791 **F: Oh okay.**

1792 P1: It was the strong red.

1793 **F: Mhm [Neutral].**

1794 P1: And 7 days lasted; it [Meaning: Participant is referring to blood] was coming out excessively.

1795 **F: Okay, thank you so much, number 1. So, when you had your last period that we are talking**
1796 **about, how long ago was it? Was it last month or 2 months ago. Those who say it was last month**
1797 **or 2 months ago, please raise your hands.**

1798 [Participants raised their hands]

1799 **F: Okay, number 2, 3, 1, 5 and 7 say that the last period that they had was last month or 2 months,**
1800 **right.**

1801 Yes [Participants response]

1802 **F: Okay, those who say their periods were 3 to 6 months ago.**

1803 [No one raised their hands]

1804 **F: Those who say their periods were more than 6 months ago.**

1805 [No one raised their hands]

1806 **F: Those who say they recently had their periods, or they are on periods now.**

1807 [Participants raised their hands]

1808 **F: Number 4 and number 6. Number 4 had mentioned that she is on her periods now. Number 6?**

1809 P6: Mine, they were the day before yesterday.

1810 **F: Okay. Alright, we are all alright. We have answered.**

1811 Yes [Participants response, participants sound tired and are speaking softly]

1812 **Okay, is there anything that you found difficult about answering the questions that I asked now?**

1813 No! [Participants responses]

1814 **F: Alright, we are now asking our last question. Okay, on your last periods that we are talking**
1815 **about, the last ones that you had, on the heaviest day of your last period, how many menstrual**
1816 **materials did you need use? We want to get that one your last period, on the heaviest day where**
1817 **you were bleeding heavy, how many menstrual materials did you use? Okay, I will say the**
1818 **numbers, if you say you used 1, you will raise your hand and so forth. So, anyone who used 1**
1819 **material, it can be pads, tampons or whichever material that you used, anyone who says they used**
1820 **1 please raise your hand.**

1821 [Participants raised their hands]

1822 **F: Okay, number 3 and number 6. Those one who say they used 2, 3 or 4, please raise your hand.**

1823 [Participants raised their hands]

1824 **F: Number 5, 1 and 7. Those one who say they used 5, 6 and 7.**

1825 [No participants raised their hands]

1826 **F: Those who say they used 8, 9 and 10.**

1827 [No participants raised their hands]

1828 **F: Alright, here on the group for the heavy, did all of you raise your hands**

1829 Yes. [Participants response]

1830 **F: And all of you here raised your hands?**

1831 Yes. [Participants response]

1832 **F: So, when I look here, especially in this group that is heavy, there was a difference with your**
1833 **numbers. Why do you think there was a difference with the number of things that you used?**

1834 [Participant raised her hand]

1835 **F: Yes, number 7.**

1836 P7: It is because before, I used to go on periods each month, now I end up seeing for myself [Meaning:
1837 Participant meant that unlike before, her periods are irregular now and just sees when she has started
1838 her periods that she has periods but can't tell anymore when they will start and finish]. So, there were
1839 other months that I didn't go on periods. So, they would take a long time.

1840 **F: Okay, maybe why do you think amongst you the numbers are not the same of the things that**
1841 **you are using?**

1842 [Participant raised her hand]

1843 **F: Yes, number 1.**

1844 P1: Maybe our blood flow is not the same.

1845 **F: Mhm [Neutral].**

1846 P1: Mhm [Yes], because I used maybe 5, the way they were flowing. I kept on bathing and inserting a
1847 [sanitary] pad, bathing and inserting a pad.

1848 **F: Okay, it can be that the volume of the blood is not the same.**

1849 P1: Yes.

1850 **F: So, the materials that you use are//**

1851 P5: //they are not the same//

1852 P1: //they are not the same.

1853 **F: Okay, this side, was there a difference?**

1854 P6: Ay I don't think so.

1855 **F: Alright, why do you think there was no difference?**

1856 [Chuckles by participants]

1857 P4: We have the same problem.

1858 [Chuckles by participants]

1859 **F: [Chuckles] I think this is the first group that didn't have differences, it is interesting that all of**
1860 **you used only one pad on that day. Okay, we can go back and sit down.**

1861 [Movements of participants going back to their seats]

1862 **F: Is there anything that you found difficult about the question that I asked you?**

1863 No! [Participants response]

1864 **F: Okay, sometimes people have a very small amount of bleeding, and they may not even need to**
1865 **use any menstrual pad, tampon, pantyliner or other material. What words would use to describe**
1866 **this very small amount of bleeding.**

1867 P3: Spotting [Participant is speaking softly].

1868 **F: Yes, number 3.**

1869 P3: Spotting.

1870 **F: Spotting. Okay, what does the word spotting mean to you?**

1871 P3: When you find small spots of blood.

1872 **F: Okay, and is it during or before periods or after periods?**

1873 P3: I don't get periods, so spotting is my period, I could say that.

1874 **F: Okay. So, is there anyone else that has something different about spotting? Does it happen that**
1875 **you spot before you go on your menstrual periods, or you spot when you are on your periods**
1876 **only?**

1877 [Slight silence by participants]

1878 P7: [Participant mumbling, inaudible].

1879 **F: Yes, number 7.**

1880 P7: Yes, I spot when I am on my periods only.

1881 **F: When you are on your periods only.**

1882 P7: Yes.

1883 **F: How do you know if you are spotting? How do you tell if you are spotting?**

1884 [Participant raised her hand]

1885 **F: Yes, number 6.**

1886 P6: It is when you see blood coming once and then it comes back again after hours.

1887 **F: Mhm [Neutral].**

1888 P6: It is not the same as being on periods where it [Meaning: Participant is referring to menstrual blood]
1889 will keep coming and won't stop.

1890 **F: Thank you so much, number 6. When you have this spotting, which material would you use, is**
1891 **it pads, tampons, how do you choose which material you will use?**

1892 P3: Judging from the experience I have had with previous spotting, because the first time I spotted I
1893 inserted a [sanitary] pad and saw that okay I have inserted a [sanitary] pad but like the [sanitary] pad is
1894 not getting full.

1895 **F: Mhm [Neutral].**

1896 P3: So, I can use a pantyliner and be alright. So, that is how I decided that I can use a pantyliner for
1897 spotting.

1898 **F: Okay, is there anyone else that has something different?**

1899 P3: No. [Participant speaking softly, participants are quiet and exhausted]

1900 **F: Okay. Our last question, when you have the small amount of bleeding, so, if you are spotting,**
1901 **how would you have answered the question that says, on the heaviest day of your last period, how**
1902 **many pads or tampons or any other materials did you use? How would you have answered this**
1903 **question if you were spotting.**

1904 P3: I will answer it and say it is one.

1905 **F: It is one.**

1906 P3: Mhm [Yes].

1907 **F: Okay, is there anyone who has something different?**

1908 [Participant raised her hand]

1909 **F: Yes, number 6.**

1910 P6: Yeah, it is one, even though the one doesn't get full. So, maybe it is a pantyliner and the pantyliner
1911 doesn't get full.

1912 **F: Oh okay, thank you so much, number 6. Number 3, you are also using a pantyliner?**

1913 P3: Mhm [Yes].

1914 **F: Okay. Alright, thank you so much, we have reached the end of our discussion. Thank you for
1915 joining our discussion today. It was very pleasant to be with you in this discussion, we have learnt
1916 a lot from you. Thank you for sharing your experiences, we understand that some of the things
1917 that we shared here were personal and very sensitive. Thank you for trusting me and be able to
1918 talk to me about things that are important to you. If there is anyone who would like to see the
1919 nurse, please let us know once we have stopped our recording. Okay, time is 12:54, date 28
1920 February 2025, FGD C106, thank you.**
